## SUMMARY

Full Stack Developer Intern skilled in Node.js, Express.js, MongoDB, RESTful APIs, authentication, authorization, and cloud-based media handling. Built and deployed a production-ready web application with complete CRUD functionality, session management, geolocation features, and image uploads. Seeking a backend or full-stack internship to apply and grow real-world development skills.

## EDUCATION

**Savitribai Phule Pune University** **Maharashtra, India**
*Bachelor of Engineering (B.E) – Artificial Intelligence and Machine Learning (Pursuing)* *2023 – 2027 (Expected)*

**New English School & Junior College Dolkhamb** **Maharashtra**
*Class XII (MSBSHSE) – 61.83%* *2022 – 2023*

## TECHNICAL SKILLS

**Frontend:** HTML, CSS, JavaScript, Bootstrap

**Backend:** Node.js, Express.js, MongoDB, RESTful APIs, CRUD Operations

**Architecture & Concepts:** MVC Architecture, Authentication, Authorization, Session Management, Middleware, Error Handling

**Tools:** Git, GitHub, npm, VS Code, Cloudinary, Render

## PROJECTS

**TripNest – Campground Listing Web Application (Live Demo)**
*Tech Stack: JavaScript, Node.js, Express.js, MongoDB, EJS, Bootstrap, Leaflet, OpenStreetMap, Cloudinary*

- Designed and developed a full-stack web application supporting user authentication, authorization, and complete CRUD functionality for listings and reviews.
- Implemented interactive geolocation features using **Leaflet** and **OpenStreetMap** with geocoding for accurate map rendering.
- Built RESTful backend APIs using Node.js, Express.js, and MongoDB following **MVC architecture** with server-side validation.
- Integrated **Cloudinary** for scalable image uploads, improving performance and avoiding database storage limitations.
- Implemented secure session-based authentication using **Passport.js (Local Strategy)**.
- Handled real-world edge cases including invalid input, unauthorized access, and server errors using custom middleware and centralized error handling.

## ACHIEVEMENTS

- Participated in Smart India Hackathon 2025, contributing to backend development of a healthcare management system focused on patient records, appointments, and treatment workflows.
