Nitesh Shukla
Software development Engineer | Full-Stack Developer
Delhi, India | +91 9919368493 | shuklan6500@gmail.com/shuklan6500@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

A results-driven and innovative Software development Engineer with expertise in full-stack development (React, Spring Boot, Java 8+, hibernate, PostgreSQL) and strong foundations in DSA. Experienced in delivering scalable projects, such as a privacy-focused, all-inclusive development area, including development and system design. Eager to contribute to fast-paced, collaborative environments tackling challenging technical problems.

EXPERIENCE (4 years)

Java Software Developer
Nexus PVT,LTD, Mumbai Thurbhe
Dec 2021 – 2023 Dec

- Built interactive UI: PDMS Login with backend, Apply RBAC, as well as dynamic menu navbar
- Responsible for frontend and backend development

  JSP+Anular.js etc.
- Collaborated with designers & backend developers, integrating PostgreSQL and REST APIs.

Software Development Engineer
CBSL group PVT,LTD, Gurugram Delhi

Mar2024-currently working

- Built interactive UI: PDMS Login with backend, Apply RBAC, as well as dynamic menu nav bar,
- Responsible for frontend and backend development

  JSP+Anular.js etc.
- Collaborated with designers & backend developers, integrating PostgreSQL and REST APIs.

TECHNICAL SKILLS

Languages: Java, spring, spring MVC, Spring boot, REST
Backend: Java 8+, spring, Spring MVC, spring boot REST.
Massaging queue: Apache Kafka, Service Discovery, JWT, and RBAC.
Frontend: JSP, Angular.js, HTML, CSS, bootstrap.
Databases: PostgreSQL.
Web: HTML5, CSS3, JavaScript (ES6+).
UI Frameworks: Bootstrap, Angular Material.
Tools: Git, GitLab, VS Code, IntelliJ IDE. Eclipse IDE

Microservices Architecture

Designed scalable Microservices architecture using Spring Boot, where each service handled a specific business domain independently.

Design Restful Microservices using Java 8, Spring Boot, JPA/Hibernate, and PostgreSQL. API Gateway, Service Discovery

ACHIEVEMENTS

- Organized and led **5+ technical workshops/events** on software development topics (Java, Spring Boot, React, Git, APIs), engaging **200+ students**.
- Served as **Team Lead in the Aspire Leadership Program**, recognized for driving collaboration, task planning, and timely delivery of technical initiatives.
- Built and deployed 10+ full-stack personal projects.
- Maintained a daily learning streak on GitHub for 120+ days.
- Helped juniors with DSA and project mentoring in campus groups.

CERTIFICATIONS

- I have completed the core java from my native place institute
- I have also completed the Java EE from my Native Please institute

INTERESTS

- Exploring new technologies
- Traveling

EDUCATION

BCA — Bachelor of Computer Application
Deemed to be University Uttar Pradesh

- 2016-2019
- CGPA: 7.8 / 10 (Till 6th semester)

MCA – Master of Computer Application
AKTU University Lucknow Uttar Pradesh
2019-2021
CGPA:6.8/10 (Till 4th semester)
10Th - Gandhinagar Board (Gujarat)

PROJECTS

PDMS — Physical Document Management System
2021 – 2023

- Digitized large volumes of physical court documents and stored them securely on a centralized local server.
- Designed and re-development a document management workflow allowing users to create, update, and track files along with detailed metadata.
- Role-based access control (RBAC) to ensure secure access based on user roles and responsibilities.
- Executed authentication and authorization mechanisms to protect sensitive judicial documents.
- Ensured structured storage and efficient querying of document-related data using PostgreSQL database.

FreshPDMS — Fresh Physical Document Management System
2024 – Present

- Digitized large volumes of physical court documents and stored them securely on a centralized local server.
- Designed the document management workflow allowing users to create, update, and track files along with detailed metadata.
- Role base authentication to ensure secure access based on user roles and responsibilities.
- applied authentication and authorization mechanisms to protect sensitive judicial documents.
- Ensured structured storage and efficient querying of document-related data using PostgreSQL database.

E-Filling ……
2024 – 2025

- Created a comprehensive High Court E-Filing system that enables litigants to digitally file petitions, register and track their legal cases, and receive real-time case status updates.
- enforced functionality for litigants to search, select, and hire advocates directly within the system, streamlining lawyer-client engagement and improving accessibility to legal services.
- Backend deployed using Docker on Render; frontend on Vercel for global speed.
