SUMMARY

I am a Full-Stack Developer with around 4 years of experience, specializing in backend core development and building scalable web and mobile applications using the MERN stack and React Native. Skilled in JavaScript, TypeScript, Redux, and RESTful APIs, I focus on delivering high-performance, secure, and user-centric solutions. I have hands-on experience with DevOps practices, including CI/CD pipelines, GitHub Actions, and cloud deployment, and have integrated AI-powered solutions using LangChain, LangGraph, and LLMs. Passionate about continuous learning, I stay updated with modern technologies to build impactful and future-ready applications.

PROFESSIONAL EXPERIENCE

Lead Software Engineer, TechXpert, | **Islamabad** **Oct 2022 - Present**

- Lead the design and development of server-side logic using Node.js, ensuring high performance and responsiveness to requests from the front-end.
- Collaborate with front-end developers to integrate user-facing elements with server-side logic.
- Develop high-performance applications by writing testable, reusable, and efficient code in Node.js.
- Oversee the maintenance, scalability, and performance optimization of central databases.
- Implement effective security protocols, data protection measures, and storage solutions.
- Run diagnostic tests, repair defects, and provide technical support for Node.js applications.
- Mentor and guide team members in Node.js development, including frameworks like Express.js.
- Manage DevOps workflows, including CI/CD pipelines, GitHub Actions, and cloud deployments, to ensure smooth integration and delivery.
- Leverage LangChain, LangGraph, and Large Language Models (LLMs) to build and integrate AI-powered backend solutions into applications.

Software Engineer, Tech Media Agency, | **Lahore** **Mar 2021 - Sep 2021**

- Develop robust, scalable and high-performance web applications using MongoDB,
- Express.js, React.js.
- Design and implement APIs using Node.js and Express.js.
- Develop front-end application architecture using React.js
- Implement data storage solutions with MongoDB, designing efficient schemas and
- optimizing performance.
- Collaborate with the team to design and launch new features, ensuring alignment with
- business objectives.
- Conduct performance tests and optimize applications for maximum speed and scalability.
- Implement security and data protection measures, ensuring application compliance with
- legal regulations

SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, Python, Node.js
- **Frameworks & Libraries:** React.js, Express.js, Nest.js, MERN Stack, Tailwind CSS, Django
- **Databases:** MongoDB, PostgreSQL, MySQL
- **DevOps & Cloud:** Git, GitHub Actions, Docker, AWS, Cloud Deployment
- **AI & Automation:** LangChain, LangGraph, LLMs, RAG, Chat Agents
- **API Development:** REST APIs, GraphQL, Third-party API Integration
- **Testing & Quality:** Unit Testing, Code Reviews
- **Core Concepts:** OOP, Agile/Scrum, System Architecture

EDUCATION

Bachelor Science of Software Engineering
Univrsity of Okara

- Relevant coursework in Software Architecture, System Design, and Project Management.

ICS
Postgraduate College Okara

ADDITIONAL INFORMATION

- **Languages:** English, Urdu
- **Certifications:**
  - Certificate in Computer Operations and Office Management
  - Python for Everybody – Coursera
  - React - The Complete Guide – Udemy
    Node.js Masterclass – Udemy

Projects

- **Car Rental Service App (Belius)**
  - Created the backend and seller dashboard using React.js and Redux for Belius, a car rental application launched in Switzerland. The platform offers users a seamless way to book vehicles on-demand, featuring real-time vehicle availability, secure booking, and location-based services. Designed with a user-friendly interface and robust backend architecture, Belius ensures an efficient, reliable, and scalable rental experience for both short-term and long-term vehicle needs.
    - **Store Link :** https://apps.apple.com/pk/app/think-true-cost/id6737412086
    - **Seller Dashboard :** https://melodic-horse-060c05.netlify.app/

- **Car Service Platform (CarDetailsHQ)**
  - Developed a web application using the MERN stack, allowing users to offer and manage car-related services such as cleaning, detailing, and maintenance. Designed for scalability, smooth performance, and an intuitive user experience.
    - **URL :** https://starlit-pasca-8d843d.netlify.app/

- **Pet Care Web App (Elder Pet) :**
  - Developed a web application using Next.js for frontend and Nest.js for backend, featuring two user roles: Pet Owner and Veterinary Doctor. Pet owners can schedule appointments, conduct video calls with doctors (via Agora integration), and track their pets' activities.

    - The platform includes secure authentication, role-based access, and a user-friendly interface to ensure smooth interactions between pet owners and veterinarians.
        - **URL :** https://steady-beignet-dd516f.netlify.app/

- **AI Marketplace Web App (Lusso.AI) :**
    - Collaborated as frontend developer, building reusable components and working on the products section. Implemented features for uploading, editing, and managing products (games, apps, movies, services, courses, AI products) and displaying product details while retrieving all user products efficiently.
        - **URL :** https://www.lusso.ai/

- **Quiz App (Structural IQ) :**
    - Worked on the backend and admin panel to manage quizzes, users, and results.
        - **Play Store Link :** https://play.google.com/store/apps/details?id=com.structuralIQ

- **Travel App (SEEK) :**
    - Developed the backend and admin dashboard for a travel app that enables users to plan tours with friends.
        - **Store Link :** https://apps.apple.com/us/app/seek-travel-discover/id6470000911

- **Ecommerece App (Convay) :**
    - Created the backend and AI chatbot using LangChain to suggest and provide product details, along with the admin panel.
        - **Store Link :** https://apps.apple.com/us/app/convy/id6657994872

- **Gym App (MY Gym Support) :**
    - Developed the backend and admin dashboard to track training sessions and body performance.
        - **App Store Link :** https://apps.apple.com/us/app/my-gym-support/id6481704480

- **QR Code Generation (QR Scanner) :**
    - Worked on the backend to generate QR codes, store information, and manage product usage.
        - **App Store Link :** https://play.google.com/store/apps/details?id=com.qrscanner2024
