Summary

- Motivated Python Developer with a solid foundation in Data Structures & Algorithms (DSA), Data Analysis, and Web Development. Proficient in Python, SQL, Pandas, NumPy, and Matplotlib, with hands-on experience in Django. Eager to apply problem-solving skills and continue learning in real-world projects.

Skills

- **Languages:** Python, C, C++, SQL.
- **Operating Systems**: Ubuntu (Linux), Windows
- **Platforms/IDEs:** PyCharm, Jupyter Notebook, Visual Studio Code
- **Data Structures & Algorithms (DSA)**
- **Technologies & Tools:** Django, NumPy, Pandas, Matplotlib, MySQL, PostgreSQL, HTML, CSS, Frappe Framework, Machine Learning, Git, GitHub, Data Visualization, Data Analysis, EDA, Scikit-learn, NLP, NLTK, Data Cleaning, Data Preprocessing Statistics, Probability
- **Machine Learning Algorithm:** Supervised Learning (Linear Regression)

Work Experience

Stackerbee Technologies|Delhi, IN
Associate Python Developer | ErpNext/Frappe Developer – Internship | Nov 2025 – Present
Roles and Responsibilities:

- Worked as a Python Backend Developer on a government ERP implementation
- Developed backend business logic using Python and Frappe Framework
- Customized ERPNext modules by creating DocTypes, Controllers, and Scripts
- Implemented server-side scripts, validations, and role-based access control
- Optimized database queries using MySQL/PostgreSQL
- Collaborated with team using Git & GitHub for version control
- Followed secure coding practices and data confidentiality standards
  Tools: Python, JS, Frappe, ERPNext, MySQL/MariaDB

Project Work

- **Real-Time Email Spam Filtering Integration**: GitHub Link
  Built a real-time email spam detection system by integrating the Gmail API with a machine learning–based spam classifier. The system securely connects to a Gmail account using **OAuth 2.0**, fetches incoming emails in real time, preprocesses the email content, and classifies messages as **Spam or Not Spam** using trained ML models. Results are displayed instantly on an interactive Streamlit web interface, with support for **manual email testing**.
  Tools & Technologies: Python, Gmail API, OAuth 2.0, Pandas, Scikit-learn, NLTK, Streamlit, TF-IDF
- **Olympics Data Analysis:** GitHub Link
  Analyzed historical Olympic datasets, performing EDA to clean, visualize, and identify trends in athlete demographics, event types, and medal counts. Applied feature engineering to create new variables like performance ratios for improved insights.
  Tools & Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn.

- **IPL-Data Analysis:** GitHub Link
  Analyzed IPL data to uncover insights on player performance, team strategies, and match outcomes. Utilized data visualization and statistical techniques to explore trends like run rates, batting averages, and bowling efficiencies.
  Tools & Technologies: Python, Pandas, Matplotlib, Seaborn, NumPy.

- **Library Management System:**
  Designed a system to efficiently manage library resources and improve administration workflow.
  Tools & Technologies: Python, Django, HTML, CSS, MYSQL

Education

- **Sharda University** *Aug 2023 – May 2025*
  Master of Computer Applications (MCA) | **CGPA: 8.15**
  Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms
- **Jamia Hamdard University | CGPA: 8.35** *Aug 2019 – May 2022*
  Bachelor of Computer Applications (BCA)
  Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms

Certifications

- **Python with Data Structures and Algorithms -** Code and Debug **CERTIFICATE**
- **Geoprocessing Using Python -** ISRO **CERTIFICATE**
- **Introduction to Natural Language Processing -** Infosys Springboard **CERTIFICATE**
- **Deep Learning for Developers -** Infosys Springboard **CERTIFICATE**
- **Information Security -** Great Learning **CERTIFICATE**
- **Python Programming -** Guvi **CERTIFICATE**
