SUMMARY

Detail-oriented Python & Django Full Stack Developer with internship experience delivering scalable web applications, RESTful services, and responsive interfaces. Strong foundation in backend engineering, database connectivity, troubleshooting, and performance enhancement. Proficient in modern frontend technologies and collaborative version-controlled development environments.

TECHNICAL SKILLS

- Programming Languages: Python, JavaScript, C
- Backend Development: Django, Django REST Framework (DRF), REST API, ORM
- Frontend Technologies: Angular, TypeScript, HTML5, CSS3, Bootstrap
- Database Management: MySQL, PostgreSQL, SQLite
- Core Concepts: Debugging, API Development, CRUD Operations, Authentication & Authorization, Agile Collaboration
- Soft Skills: Communication, Problem Solving, Analytical Thinking, Team Collaboration, Adaptability, Time Management

---

WORK EXPERIENCE

Python Developer Intern – Febno Technologies

June 2025 - Present

- Engineered backend components using Python and Django, establishing secure authentication and high-performance REST API services.
- Administered MySQL/SQLite databases, refining queries and maintaining structured CRUD workflows for reliable data handling.
- Integrated external services and internal endpoints, validated APIs through Postman, and resolved issues via systematic troubleshooting.
- Contributed to feature upgrades using Git/GitHub while supporting deployment activities and improving application responsiveness.

Software Development Intern — Riss Technologies

- Constructed real-time web application features using Django, delivering structured backend logic and service endpoints.
- Crafted adaptive user interfaces with HTML, CSS, and JavaScript to strengthen frontend–backend interaction.
- Enforced role-based access control, input validation, and secure request handling for application protection.
- Assisted in quality assurance through test execution, defect tracking, and continuous issue resolution to maintain system stability.

PROJECTS

Realtime Mock Interview System

- Architected an AI-powered interview simulation platform using Python and Django, designing scalable system architecture with modular Admin, Company, and User roles for structured workflow management.
- Built backend services and secure user authentication, implemented optimized database design (MySQL/SQLite), and developed robust REST API integration for seamless data exchange.
- Applied AI concepts and real-time processing techniques to analyze facial expressions, head movements, and response timing, enabling adaptive dialogue management and behavioral assessment.
- Developed interactive front-end interfaces using HTML, CSS, and JavaScript, integrating dynamic feedback mechanisms and a 3D-based virtual interview environment.
- Conducted extensive testing, performance tuning, and systematic debugging, ensuring application reliability, accurate evaluation metrics, and smooth end-to-end user experience.

Student Management System

- Designed and implemented a scalable web application using Python and Django, delivering robust backend development for managing student records, attendance tracking, and academic performance.
- Formulated secure authentication and role-based authorization for administrators, teachers, and students, ensuring controlled access and data protection.
- Expanded structured REST API endpoints and optimized database management with MySQL/SQLite, enabling efficient CRUD operations and reliable data processing.
- Built dynamic dashboards and interactive interfaces using HTML, CSS, and JavaScript, enhancing user engagement and real-time information visibility.
- Performed systematic debugging, functional testing, and performance optimization, improving system stability, accuracy, and overall application reliability.

EDUCATION

Bachelor of Computer Application
University of Calicut | 2022–2025

Python Fullstack
Technodot Academy

CERTIFICATIONS

- Python Full Stack Development – Technodot Academy
- Web Scraping Using Scraper API in Python – SkillEcted
- Webinar: HTML, CSS & JavaScript – SkillEcted
