Data Engineer | Cloud & Big Data Specialist | ETL & Analytics Engineering

Seeking to leverage hands-on experience in building scalable ETL pipelines, cloud-native data platforms, and analytics-ready datasets to deliver reliable data solutions that enable informed business decision making.

Profile Summary

- Data Engineer with **2 years of professional experience** designing and delivering end-to-end data pipelines across enterprise, healthcare, and supply chain domains.
- Currently working at **Team Computers Pvt. Ltd.**, contributing to large-scale dashboard automation and data engineering projects for clients including **SAR Group** and **Sir Ganga Ram Hospital**.
- Experienced in **ETL pipeline development, data ingestion, transformation, and validation** using **PySpark, SQL, and Azure services**, and deploying **scalable workflows with Apache Airflow**.
- Proven ability to collaborate with business users and stakeholders to gather requirements and translate them into analytics-ready datasets.
- Detail-oriented problem solver with a solid understanding of **data modeling, KPI computation, and performance optimization**.

Core Competencies

Data Engineering & ETL Architecture | Data Ingestion & Transformation
Cloud-Native Data Platforms (Azure) | Big Data Processing (PySpark)
Workflow Orchestration (Apache Airflow) | Data Modeling & Validation
Analytics Enablement & Dashboard Support | SQL Optimization
Stakeholder Requirement Gathering | Data Quality & Consistency Assurance

Technical Skills

Programming & Query Languages: SQL (MySQL, MS SQL Server), Python(Pandas, NumPy)
Big Data & Processing: Apache Spark (PySpark)
Cloud & Data Platforms: Microsoft Azure (Data Lake, Azure Pipelines)
Data Engineering & ETL: Data Ingestion, Data Cleaning, Data Transformation, ETL Pipeline Design
Workflow Orchestration: Apache Airflow
Data Visualization & Analytics: Power BI, Microsoft Excel

Work Experience

Team Computers Pvt. Ltd. - Data Engineer | Mar 2025 – Present

Projects:
MD Dashboard Automation | Company: SAR Group
Supply Chain Management (SCM) Dashboard ETL | Company: Sir Ganga Ram Hospital

- Developed **automated ETL pipelines** consolidating data from **SAP and Oracle tables** for MD and SCM dashboards.
- Performed **data ingestion, cleaning, transformation, and validation** using **PySpark**, ensuring data accuracy and consistency.
- Scheduled and orchestrated ETL workflows using **Apache Airflow**, improving pipeline efficiency and reliability.
- Implemented a **three-stage Azure ETL pipeline** for consolidated and analytics-ready datasets.
- Delivered reliable, processed data for **executive dashboards and SCM reporting**, enabling faster, accurate decision-making.

Netzwala Services Pvt. Ltd – Data Engineer | Mar 2024 – Mar 2025

Project: Sales & Distribution ETL Pipeline | Company: Kajaria Pvt. Ltd.

- Designed and implemented a **three-layer ETL framework** (Raw, Processed, Analytics) for large-scale Sales & Distribution data.
- Ingested data from multiple Oracle source tables into Azure Data Lake**.**
- Built Stage 1 (Raw) and Stage 2 (Cleansed/Processed) pipelines using Azure services**.**
- Orchestrated and monitored workflows using Apache Airflow with error handling and retries.
- Collaborated with analytics teams to enable Power BI dashboards and Excel-based reporting.
