WORK EXPERIENCE

Syrma sgs technology
-Fullstack Developer Strengthened proficiency in HTML, CSS,JAVASCRIPT, REACT JS SQL and JAVA applying theoretical knowledge to practical scenarios during the work.

INTERNSHIP PROJECT

SQL:BankAccountCreation
Technologie Used:My SQL.

This project involves developing a database system to manage customer information, account details, and branch data. It includes creating tables for customers, branches, and accounts, along with SQL queries to support these operations.

JAVA: ATM project
Technologies Used: Java, JDBC, SQL.

Successfully integrated and enhanced the ATM system for a financial institution using Java. This project involved developing and implementing functionalities to improve transaction efficiency and security.

Frontend: E-Commerce Website
Technologies: HTML, CSS, JavaScript, React.js

This project is an online shopping website where users can browse products in categories like electronics, jewellery, men's wear, and women's wear. It includes pages for product details, sign-in/sign-up, and a shopping cart. Built with HTML, CSS, and JavaScript for design and interactivity, and React.js for fast, dynamic page updates.

EXPERIENCE

1. Create responsivewebpages utilizing HTML, CSS,JavaScript, and React.js.

2. Craft and refine SQL queries for efficient data access and modification.

3. Apply database constraints, joins, and indexing to enhance data integrity and system performance
