## JAYAKANTH B

**Front-End Engineer** Pallipalayam, Namakkal, TN 638006 | 8072286203 | jayakanthboopathi@gmail.com

**PROFESSIONAL SUMMARY**

Front-End Engineer with 2+ years of experience in the **React ecosystem**. Expert in building **performance-oriented** web applications using **React Hooks**, **TypeScript**, and **JavaScript (ES6+)**. Proven track record in a **product-focused engineering team**, consistently delivering responsive interfaces and optimizing load times by **15%**. Strong **problem-solving skills** applied to debugging UI issues and integrating complex **REST APIs**.

**TECHNICAL SKILLS**

- **Core:** ReactJS, React Hooks, JavaScript (ES6+), TypeScript, HTML5, CSS3, REST APIs.
- **State Management:** Redux, Redux Toolkit, Context API.
- **UI/Design:** Material UI (MUI), Tailwind CSS, Responsive Design, Mobile Responsiveness.
- **Tools:** Git, GitHub, VS Code, Postman, Jira, Dev Tools, React Testing Library.

**PROFESSIONAL EXPERIENCE**

**App Innovation Technologies**, Coimbatore **Front-End Developer** | **04/2023 – 12/2025**

**Project: Reality Works AI** (AI Patient Simulation Platform)

- **Led front-end development** using **ReactJS** and **TypeScript** to build the core UI/UX for a simulation platform, improving component reusability across the team.
- Integrated **HeyGen API** to enable real-time avatar conversations, utilizing advanced **problem-solving skills** to minimize API latency.
- Developed comprehensive **avatar customization features**, ensuring a seamless user experience for diverse simulation environments.
- **Collaborated cross-functionally** with a **product-focused engineering team** to document UI processes and share knowledge on modern React patterns.

**Project: Actavino**

- **Optimized application performance** by refining React components, resulting in a **measurable 15% reduction in page load time**.
- Collaborated within a **cross-functional team** of designers and backend engineers to integrate **REST APIs** for real-time data delivery.
- Improved platform reliability by **20%** through **rigorous code reviews** and systematic debugging of cross-browser compatibility issues.
- Delivered complex features (chat, feeds, events) using **Material UI**, maintaining **100% mobile responsiveness** for a growing user base.
- Authored technical documentation for UI components, reducing onboarding time for new engineers by **30%**.

**EDUCATION**

- **M.C.A. (Computer Application)** | Alagappa University | **Expected 06/2026**
- **B.C.A. (Computer Application)** | Periyar University | **CGPA: 7.6** | **2022**

**MINI-PROJECTS**

**Event Management Dashboard**

- Developed a dashboard using **Redux Toolkit** for global state management, allowing for **real-time data tracking** of event metrics.

**Weather Forecasting Application**

- Engineered a responsive weather app using **React.js** and **OpenWeatherMap API** to provide real-time meteorological data.
- Used **Debouncing** techniques in the search functionality to optimize API calls and enhance application performance.

**Task Management (Todo) System**

- Developed a robust Todo application featuring **CRUD operations** and persistent storage using **Local Storage**.
- Integrated **filter logic** (All, Active, Completed) using **React Hooks (useState, useEffect)** to manage application state efficiently.

**DECLARATION**

I hereby declare that all the information provided above is true to the best of my knowledge and belief.
