PROFESSIONAL SUMMARY

Full Stack Developer with expertise in building scalable web applications using MERN stack and modern web architecture. Proven experience developing multi-tenant SaaS platforms with real-time communication, payment integration, and AI-powered features. Improved institutional operational efficiency by 70 percent through automation and digitization. Strong problem solving skills, attention to detail, excellent verbal communication, and organizational skills. Proficient in front end web development, programming languages, and computer science fundamentals. Committed to delivering high-quality, maintainable web applications using clean architecture and SOLID principles.

TECHNICAL SKILLS

Programming Languages: JavaScript, TypeScript, SQL, Programming Languages

Front End Web Development: React.js, Redux Toolkit, HTML5, HTML, CSS3, CSS, Tailwind CSS, Bootstrap, Responsive Design, JavaScript ES6+, Front End Languages, Web Architecture

Full Stack Development: MERN Stack, Node.js, Express.js, Full Stack Web Applications, RESTful APIs, Microservices, API Design, MVC Architecture

Backend Development: Node.js, Express.js, WebSockets, Socket.io, Clean Architecture, SOLID Principles

Database Technologies: MongoDB,GraphQL, Mongoose, PostgreSQL, SQL, Database Design, Query Optimization

Cloud and DevOps: AWS EC2, Nginx, PM2, Linux Server Configuration, Deployment, CI/CD Pipeline

Payment Systems: Razorpay Integration, Stripe Payment Gateway, Payment Gateway Integration, Refund Processing

Development Tools: Git, GitHub, Postman, NPM, Webpack, VS Code, Vite

Real-Time Technologies: WebSockets, Socket.io, WebRTC, Video Conferencing, Live Chat Systems

AI and ML Integration: OpenAI API, Gemini API, Natural Language Processing

Additional Skills: JWT Authentication, Cloudinary, Multer, Nodemailer, Bcrypt, Data Structures, Algorithms, System Design, Design Patterns, Agile Methodology, Project Management Skills

WORK EXPERIENCE

Full Stack Developer - Freelance
BRAINNIX School Management System (SaaS Platform)
January 2024 - Present
React.js, Node.js, TypeScript, MongoDB, AWS
GitHub: github.com/Jobhishlal/School_Management

Developed comprehensive multi-tenant SaaS platform to digitize and automate school operations for multiple institutions with secure data isolation, subscription management, and role-based access control. Led full stack development from architecture design to deployment.

Key Achievements:

- Architected and developed multi-tenant SaaS infrastructure supporting 15 plus institutions with complete tenant isolation, improving data security by 100 percent
- Implemented subscription management system integrating Razorpay and Stripe payment gateways, processing over 500 transactions monthly with automated billing and refund handling
- Integrated AI-powered learning assistant using OpenAI API, reducing student query response time by 85 percent and providing real-time educational support
- Built real-time video conferencing system using WebRTC supporting 50 plus concurrent users for parent-teacher meetings and staff collaboration
- Developed comprehensive parent dashboard enabling real-time monitoring of student progress, increasing parent engagement by 60 percent
- Created dynamic fee management module with automated fine calculations, reducing administrative workload by 45 percent
- Implemented assignment and examination management system with Cloudinary file uploads, streamlining grading process and saving 10 hours per week
- Established real-time notification system using WebSockets and Socket.io, delivering instant updates to 1000 plus active users across Admin, Teacher, Student, and Parent roles
- Deployed scalable application on AWS EC2 with Nginx reverse proxy and PM2 process management, achieving 99.9 percent uptime
- Applied SOLID principles, Repository Pattern, and Clean Architecture, reducing code maintenance time by 40 percent
- Improved institutional operational efficiency by 70 percent through automation and digitization, saving 20 plus hours weekly per institution

Full Stack Developer - Personal Project
E-Commerce Platform - Vguire
June 2023 - December 2023
Node.js, Express.js, MongoDB, Razorpay
GitHub: github.com/Jobhishlal/Vguire

Built comprehensive e-commerce web application with complete product catalog management, shopping cart functionality, and secure payment processing. Managed full development lifecycle from requirements gathering to deployment.

Key Achievements:

- Developed RESTful API architecture handling 200 plus products with user authentication and order processing capabilities
- Integrated Razorpay payment gateway processing secure online transactions, handling 100 plus orders with zero payment failures
- Implemented JWT authentication and bcrypt password hashing, ensuring 100 percent secure user data protection
- Created responsive frontend interface with dynamic product filtering, improving user experience and reducing search time by 50 percent

- Built comprehensive admin panel for inventory management and sales analytics, increasing administrative efficiency by 35 percent
- Designed optimized MongoDB database schema with indexed queries, improving page load time by 60 percent
- Achieved 95 percent mobile responsiveness score ensuring seamless cross-device user experience

Frontend Developer - Personal Project
Netflix Clone - Streaming Platform
March 2023 - May 2023
React.js, Firebase, TMDB API
GitHub: github.com/Jobhishlal/Netflix_Clone

Developed movie streaming web application with dynamic content delivery, user authentication, and personalized recommendations. Focused on creating responsive UI and optimizing application performance.

Key Achievements:
- Implemented responsive UI design replicating Netflix interface, achieving 90 percent UI similarity score
- Integrated TMDB API fetching real-time data for 10000 plus movies and TV shows with dynamic content updates
- Built user authentication system using Firebase Authentication, supporting 50 plus registered users
- Created personalized user profiles with watchlist functionality, increasing user engagement by 40 percent
- Optimized application performance with lazy loading and code splitting, reducing initial load time by 55 percent
- Achieved 92 percent Google Lighthouse performance score through optimization techniques

Backend Developer - Personal Project
User Management System
January 2023 - February 2023
Express.js, TypeScript, MongoDB

Developed secure CRUD application with comprehensive user management capabilities and role-based access control. Implemented best practices for API security and data validation.

Key Achievements:
- Implemented JWT-based authentication system with secure token management, achieving zero security breaches
- Created 15 plus RESTful API endpoints following REST principles and industry best practices
- Built role-based access control system supporting Admin, Manager, and User roles with granular permissions
- Developed comprehensive input validation using Joi, reducing invalid data submissions by 95 percent
- Designed type-safe backend using TypeScript, reducing runtime errors by 80 percent and improving code maintainability by 50 percent

EDUCATION

Bachelor of Computer Applications (BCA)
University of Mysore, Karnataka, India
Graduated: June 2024
CGPA: 7.0 / 10.0
Relevant Coursework: Data Structures, Algorithms, Database Management Systems, Web Technologies, Software Engineering, Programming Languages, Computer Science

Higher Secondary Education - Computer Commerce
Kerala Board of Higher Secondary Education, Kerala, India
Completed: March 2020
Percentage: 85 percent
Focus: Computer Science, Commerce, Mathematics

PROFESSIONAL ATTRIBUTES

- Strong problem solving skills with systematic approach to complex technical challenges
- Excellent verbal communication and written communication skills with experience in technical documentation
- High attention to detail ensuring code quality, security, and best practices implementation
- Strong organizational skills managing multiple projects and meeting tight deadlines
- Self-motivated learner committed to staying current with emerging web technologies
- Proven ability to work independently and collaboratively in team environments
- Strong project management skills with experience leading development initiatives from concept to deployment
- Detail-oriented approach with focus on creating maintainable, scalable solutions
