Shoeb Imteyaz Ahmed

Mobile No.: **7303764284**
Email-id: **shoebahmed370@outlook.com**
Master of Technology in Electronics and Telecommunications

CAREER OBJECTIVE

To work in a firm with a professional work-driven environment where I can utilize and apply my knowledge, skills which would enable me as a post graduate to grow while fulfilling the organizational goals.

PROFESSIONAL SUMMARY

- 5+ year(s) of total experience
- Good experience with Statistics, Machine Learning, and Deep Learning
- Hands-on experience with cloud technology like AWS
- Hands-on experience in various Python frameworks like REST API, Simple Salesforce API, HubSpot API, Selenium, Beautiful Soup
- Also have a strong experience with client interaction.
- Hand-on Experience with Data Labelling tools LabelImg, VoTT and Label Studio

TECHNICAL SKILLS

Programing Language	Python
Cloud Technology	AWS: AWS Lambda, AWS ECS, AWS Batch. Azure: Azure Blob Services, Azure Data Lake. GCP: Spreadsheet API
Machine Learning	Supervised and Unsupervised learning, Model Selection and NLP Libraries: Scikit Learn, TensorFlow, Keras, PyTorch Data Annotation Tools: Label Studio, Label Img and VoTT
Artificial Intelligence	Artificial Neural Networks, Convolutional Neural Networks, Open AI
SaaS	Salesforce, HubSpot
ETL Tools	Informatica
Databases	MySQL, MongoDB
Repository	Tortoise SVN, Git
Data Visualizations	Power BI, Matplotlib, Seaborn
Docker	Docker, ECS and AWS Batch
Web Technologies	Flask

EDUCATIONAL QUALIFICATION

Degree/Examination	Year of Passing	School/Institute	Board/University	Percentage/CGPA
Master of Technology (Electronics and Telecommunications)	2019	Bharatiya Vidya Bhavan's Sardar Patel Institute of Technology, Andheri	Autonomous (Affiliated to Mumbai University)	7.94 CGPA (75.4 %)
Bachelor of Engineering (Electronics)	2016	Theem College of Engineering, Boisar	Mumbai University	5.99 CGPA
H.S.C	2012	Tarapur Vidya Mandir & Jr. College, Boisar	Maharashtra State Board	58.83 %
S.S.C	2010	Tarapur Vidya Mandir School, Boisar	Maharashtra State Board	67.45 %

PROFESSIONAL EXPERIENCE

Organization	**Eclerx Service Pvt Ltd**
Tenure	3rd September 2024 - Present
Designation	**Sr. Software Engineer**
Organization	**Abacus Staffing and Services Pvt(Eclerx Pvt Ltd Payroll)**
Tenure	8th December 2023 - 28th August 2024
Designation	**Python Developer**
Organization	**Aress Software and Education Pvt Ltd**
Tenure	20th July 2021 - 6th December 2023
Designation	**Senior Data Analyst**
Organization	**Embedded Technosolutions**
Tenure	12th March 2020 - 16th July 2021
Designation	**Python Developer and Trainer**

PROJECT DETAILS

1. **E-commerce Data Gathering for Market360 at eClerx Digital**:
   - Gathering and analyzing data from e-commerce websites using advanced web scraping techniques for the Market360 product at eClerx Digital.

   Technology used: Python, BeautifulSoup, Requests, MongoDB.

2. **Building of Salesforce Chrome Extension**:
   - To build a Chrome extension that scrape a Salesforce page and extract the Product Name and details using Open AI.
   - After that will get the quotation with respect to Product using Ingram API.

   Technology used: Javascript, HTML, CSS and Manifest.json.

3. **Email Out bounding (From Salesforce CRM to Lender Email)**:
   - Loan details and attachments are extracted from the Salesforce Submission Object using Python Simple Salesforce API.
   - The extracted data is then subjected to data cleaning based on client requirements, followed by sending the loan details to the lender via email and API using Python. Additionally, the data and attachments are uploaded to AWS RDS MySQL for storage.

   Technology used: Python, Salesforce API, Request, SMTP, AWS Relational Database Service MySQL.

4. **Data Integration to Hubspot:**
   - Integrate data into Hubspot using python.
   - Inserting and upserting record in Hubspot using python
   - Creation of customize field and custom object using python.

   Technology used: Hubspot, Hubspot Python SDK, Pandas.

5. **Data Integration from Client email to AWS Database/DataLake:**
   - As client mail has been forwarded to AWS Workmail it will automatically transfer the raw email data into the S3 bucket.

- Whenever some new object appears in the S3 bucket, it will trigger the AWS Compute Services(AWS Lambda/ AWS ECS/ AWS Batch).
- This computes service will manipulate and, clean the data and ingest it into AWS Database Services (AWS RDS/ AWS Redshift).
- We can monitor the output of compute services in AWS Cloudwatch.

Technology used: Python, AWS Boto3, AWS Services, Docker

6. **Data Migration from Salesforce to Lenders API:**

   - Extract the loan details like the Organization's name, lender's name, and the amount requested from the Salesforce Submission Object, and also downloads all the attachments.
   - Submitting the above details to the lenders via API service and storing the API response in AWS RDS MySQL and Salesforce Submission Object.

   Technology used: Python, Simple Salesforce, Regex, Python Request, AWS RDS

7. **Patient and Pharmacy Data Management (using Informatica):**

   - Used Data Quality Transformations to clean and validate data.
   - Applied Expression, Filter, and sorter transformation to extract data using different conditions. Worked with hospital data to analyse overall ratings and facilities.

   Technology used: Database, Flat File, Informatica, Azure

8. **Customer Data Management (using Informatica):**

   - Update Strategy to Insert, Update, and Delete records.
   - Rank and Union Transformations.
   - Sequence Generator to generate Unique Keys Router Transformation to apply multiple filters.

   Technology used: Oracle, Informatica

9. **Machine Learning-based prediction engine helped an Auto Insurance Company:**

   - Scraped car descriptions and prices from an E-commerce car-selling website.
   - Cleaned the data and developed an Artificial Neural Network (ANN) model to predict car prices based on various factors, which was then deployed in a web application.

   Technology Used:- Python, TensorFlow, Scikit learn, Pandas, Flask, HTML, Google Colab to test Optuna.

10. **Data Streaming from OpenDatablend to AWS and Azure:**

    - This project aims to work on OpenDatablend packages to Integrate into AWS and Azure platforms.
    - When any developer uses AWS S3 or Azure Blob Storage function. It will stream your choices of data into their S3 bucket or Azure Blob Storage Account.

    Technology used: Python, OpenDatablend, AWS Boto3, Azure Blob Storage and Azure Data Lake, Pandas.

11. **1Password Integration with Python:**

    - 1Password platform is a password manager, digital vault, form filler, and secure digital wallet.
    - The project aims to extract the lender's credentials from 1Password vaults.
    - That lender's credential is used to log into the Portal of Lender to scrape data and put it into Salesforce.

    Technology used: 1Password, Docker, Python, 1Password SDK.

12. **Data Integration from Email to Salesforce:**

    - Loan response and funding details are extracted from emails using Python IMAP.

- The extracted data is then filtered to extract specific information, such as the highest funding amount and buyrate. These data aggregation and manipulation steps are performed to prepare the data for publishing into the Salesforce Submission object along with an attachment.

Technology used: Python, Salesforce API, Salesforce, Selenium, Beautiful Soup, Request, IMAP, PolyFuzz

PUBLICATIONS AND PRESENTATIONS:

- **Ahmed Shoeb, DR. Y.S. Rao.** "Toxic Gas Detection and Analysis using IoT." Internationational Journal of Scientific Research: Volume-9, Issue-2, February-2020.

INTERNSHIP DETAILS:

- **Trainee IoT Engineer** at **"Whrrl Fintech Solutions"**, Thane, Mumbai. Duration: 16th September 2019 to 15th December.

CERTIFICATIONS:

- Completed AWS S3 Basics Course on January 5th, 2023, through Coursera Project Network
- Certified for completing a course on Getting Started with Power BI Desktop at Coursera on November 4th, 2020
- Certified for completed a six weeks online training on Machine Learning organize by Analytics Vidhya from 24th April, 2020 to 5th June, 2020 at Internshala Trainings.

ACHIEVEMENTS

- Employee of the Month of October 2021
- Secured second position in make-a-thon of iB-HUBS IoT Bootcamp '18 on a project "IoT BASED TAP WATER MONITORING SYSTEM".

WORKSHOPS/CONFERENCES:

- Attended five day's workshop of iB-HUBS IoT Bootcamp '18 on – "Comprehensive Hands-On training on IoT and Cyber Security" at Mumbai during June 25 - 29, 2018.

DECLARATION:

I hereby declare that the above – mention information is correct to the best of my knowledge. I hope that my qualification skills would meet your requirement and I would be provided to serve your prestigious organization.

Place: Mumbai **Ahmed Shoeb Imteyaz**
Date:
