Namala Mahesh

namalamahesh44gmail.com +91-6281010942 LinkedIn GitHub LeetCode

Profile Summary:

Data Analyst and Computer Science Student with hands-on experience in predictive analytics, Motivated and detail-oriented **Software Engineering Intern** with proven experience in **full-stack development**, **machine learning**, and **data-driven application design**. Proficient in **object-oriented programming**, **data structures and algorithms**, and **agile methodologies**. Adept at solving complex technical problems, collaborating in **cross-functional teams**, and learning new technologies quickly. Passionate about building scalable, secure, and high-performance solutions to drive user satisfaction and product excellence.

EDUCATION

NRI INSTITUTE OF TECHNOLOGY 2022 – 2026 Vijayawada, India

Bachelor of Technology in Computer Science and Engineering

CGPA – 8.87

TECHNICAL SKILLS

Programming Languages: Python, C, JavaScript, SQL, HTML, CSS

Core Competencies: Data Structures, Algorithms, OOP, SDLC

Database Technologies: MySQL, MongoDB

Concepts: Object-Oriented Design, Machine Learning, NLP, Data Analysis, Model Evaluation

Methodologies: Agile, Scrum, Version Control

EXPERIENCE

1. **Visualizing Carbon Footprints across the sectors(EDUNET)**
   Built interactive Power BI dashboards using real datasets to visualize carbon footprints, improving data clarity and decision-making accuracy by 60%.
2. **AI: Transformative learning with TechSaksham (Microsoft & SAP)**
   Developed an SMS spam detection model using NLP and Naive Bayes achieving 95% accuracy.
3. **Summer Internship on Artificial Intelligence and Their Tools**
   Implemented and tested over 10 AI tools including neural networks and deep learning frameworks

PROJECTS

1. **Diabetes Prediction (Python, Random Forest, Data Analysis):**
   Built a Random Forest model with 98% accuracy to predict diabetes from health data.
2. **Power BI Sustainability Dashboards**
   Created 15+ dashboards from unified datasets, visualizing sustainability impact across 5 industry sectors and improving data comprehension for non-technical users
3. **Tic-Tac-Toe Game (Python, Tkinter)**
   Developed a fully functional GUI-based game, applying 100+ lines of Python logic to enhance understanding of GUI development and control flow.
4. **SMS Spam Detection (NLP, Naive Bayes)**
   Built a text classification model using NLP techniques and Naive Bayes to detect spam messages with 97% accuracy, applying data cleaning, TF-IDF vectorization, and evaluation metrics

CERTIFICATES

Python – Code Chef (top 15% learners), Hacker Rank (Global Rank)

SQL – Hacker Rank (Intermediate Badge)

Machine Learning - DeepLearning.ai (Completed with 90%+ average)

Generative AI – LinkedIn Learning, Microsoft
