KARTHI T

Chennai | +91 6385560355 | karthi.t.dev@gmail.com | LinkedIn

Objectives

I am a passionate and detail-oriented Computer Science graduate specializing in full-stack web development. My skills span **HTML, CSS, Python,** and **MySQL**, backed by practical experience in Agile methodologies. I have a proven track record of solving complex problems and collaborating effectively in team environments. I am eager to leverage my skills in a challenging web development role to contribute to innovative projects

Education

VRS COLLEGE OF ENGINEERING and Technology **2020-2024**
B.E.Computer Science Engineering
7.7

Government Higher Secondary School **2019-2020**
HSC
71

Government High School **2017-2018**
SSLC
82.62

Technical Skill

Programming Language : Python

Web Development : HTML ,CSS,Javascript,Bootstrap

Framework: Django,FastAPI,Flask

DataBase : MySql

Internship

Intern – Web Development and Software Training **JAN – JUL 2025**
Uniq Technologies, Chennai

- Delivered 5+ dynamic web modules combining **HTML**, **CSS**, **JavaScript**, and **Python**, enhancing user interaction and responsiveness
- Developed end-to-end **CRUD** functionalities in **Flask** and **Django**, enabling seamless user account and session management
- Integrated **RESTful APIs** that improved data flow between front-end and back-end by 25%
- Optimized **MySQL** queries to reduce response times by 35%, ensuring faster data access and loading
- Followed the **Agile methodology** for weekly sprint reviews and maintained version control with **GitHub**

Project

Missing Child Surveillance Analysis Using RNN Final Year Project
Technologies: Python, Recurrent Neural Networks (RNN), OpenCV, HAAR Cascade

- Designed and executed a multi-point facial recognition pipeline using HAAR Cascade and RNNs to ensure consistent matching across sequential frames
- Boosted image processing speed by 30% through efficient frame extraction and parallel analysis techniques
- Automated notification workflows, cutting down manual review time by 40%, and implemented email alerts directly to law enforcement
- Validated system outputs against a curated dataset, significantly reducing false matches in complex crowd environments
