Ethamukkala Venkateswarlu

Gudur, Andhra pradesh | +917680040998 | venkateshe5c8@gmail.com | www.linkedin.com/in/

A motivated and detail-oriented recent graduate with a strong foundation in Data Science, Artificial Intelligence (AI), and Machine Learning (ML). Proficient in Python programming and data analysis, with hands-on experience in statistical modeling and data visualization.

EDUCATION

Bachelor of Technology | Computer Science and Engineering *2021-2025*

CGPA – 8.7 | Narayana Engineering College

Higher Secondary | APSWRS, Chillakuru | Percentage – 75% *2021*

SKILLS

- Data Science
- Python Programming
- C Programming
- Sql
- My Sql
- Excel
- Artificial Intelligence
- Machine Learning
- Problem Solving
- NetWorking

PROJECTS

- **Customer Churn Prediction:** Customer churn prediction involves using machine learning algorithms to analyze customer behavior and identify patterns that indicate the likelihood of a customer discontinuing a service or product.
- By leveraging historical data, such as customer demographics, purchase history, and engagement metrics, businesses can proactively implement retention strategies to reduce churn rates and improve customer loyalty.
- **Credit Card Fraud Detection:** Credit card fraud detection utilizes machine learning techniques to analyze transaction data in real-time, identifying suspicious patterns and anomalies that may indicate fraudulent activity.
- By implementing advanced algorithms, financial institutions can enhance their ability to detect and prevent fraud, minimizing financial losses and protecting customer accounts.
- **Car Resale Price With Maintenance Prediction**: Machine learning models can analyze various factors such as make, model, age, mileage, and maintenance history to predict the resale price of a car, providing valuable insights for both sellers and buyers.
- Additionally, these models can forecast future maintenance costs based on historical data, helping owners make informed decisions about car ownership and investment**.**

WORK EXPERIENCE

- **Python (Intern) :** **November 2023 December**

  Bengaluru, HSR Layout, Skill Vertex

  - This internship offers a hands-on experience in Python development, allowing interns to work on real-world projects, enhance their coding skills, and collaborate with experienced developers in a dynamic environment.
  - As a Python Developer intern, you will be involved in designing, developing, and testing applications, while also learning to utilize various frameworks and libraries to enhance functionality and performance.
- **Python (Intern):** **May 2023 Jun**

  Hyderabad,Pntech Solutions

  - This internship provides an excellent opportunity for aspiring developers to gain practical experience in Python programming, working on innovative projects and collaborating with a skilled team.
  - Interns will be tasked with developing and optimizing software applications, allowing them to enhance their

coding skills and understand real-world software development processes.

- **Data Science with Python,AI&ML(Intern): December 2025 Mar**

Hyderabad,100 feets Road Brain O Vision

- Developed tools for geospatial analysts using Python.
- Focused on software usability and intuitive data display.
- Supported all lifecycle activities from analysis to maintenance.
- I gained valuable experience through multiple internships, primarily focusing on Python development.
- Data analysis, and collaboration within teams to enhance software solutions.

CERTIFICATIONS & TRAININGS

- Python Programming
- Artificial Intelligence
- Artificial Intelligence & Machine Learning
- Data Science with Python, Artificial Intelligence and Machine Learning
