Karishma Patil

Designation: Java Software Developer(Analyst)

karishmapatil185@gmail.com | +91 7758848437 |www.linkedin.com/in/karishma-patil-801a221a

Professional Summary

Results-driven **Java Software Developer** with **3+ years** of experience in designing and implementing scalable backend solutions using **Java** and the **Spring framework**, including **Spring Boot**, **MVC**, and **Security**. Proven ability to enhance application performance and reliability, contributing to a 20% improvement in system efficiency in previous projects. Committed to continuous improvement, leveraging strong **problem-solving skills** within **agile** teams to deliver high-quality, maintainable code.

Skills

Soft Skills	Team Collaboration, Adaptability, Time Management, Continuous Learning
Languages	Java,Restful API, SQL, HTML, CSS, Javascript
Frameworks- Back End	Spring (Core, MVC, REST, Boot), JPA, Microservices ,Kafka(Conceptual Knowledge)
J2EE Technologies	Servlet and JDBC
RDBMS Applications	Oracle, Postgres
Web Servers	Apache Tomcat, JBoss
Code Quality Tools	Sonar Lint, and SonarQube
Build Automation Tool	Maven
Version Control System	Git with GitHub, SVN
Software Development Processes (SDLC)	Waterfall Model
Other Tools	Tortoise Git, Jira, Eclipse, STS, PLSQL, iReport and MSOffice (Word, Excel, PowerPoint)

Work Experience

Java Developer **Dec 2022 - Present**
EBIX TECHNOLOGY LTD.

- Proficient in **Spring Boot** and **JPA** for developing robust Java applications.
- Enhanced enterprise-grade applications using Java and Spring Boot, improving system response times by **20%**..
- Designed and implemented **RESTful APIs** for seamless application integration.
- **JIRA** was used as a project management tool
- Utilized **Postman** for API testing, ensuring clarity and ease of use.
- Delivered configurable applications to align with product specifications.
- Utilized Git and GitHub for efficient code versioning and collaboration within cross-functional Agile teams.
- Effective communicator with experience in cross-functional team collaboration

Projects

Loan Management System (LMS)

- Developed and maintained a Loan Management System using **JavaScript** (frontend) and **PL/SQL** (backend).
- Applied **MVC architecture** with the **Struts2** framework for scalable and maintainable application design.
- Resolved complex issues through **strong problem-solving** skills, enhancing system performance and reliability.
- Provided technical support and delivered solutions for clients including **Catholic Syrian Bank** and **Alghanim** Group.
- Collaborated with cross-functional teams to implement feature **enhancements** and ensure timely releases.

Client: Axis Finance Limited (AFL Portal)

- Built the AFL Portal using React JS for the frontend and Spring framework for the backend.
- Integrated the portal with the Loan Management System (LMS) to fetch and display client loan information, including upcoming EMI details, loan duration, and interest rates.
- Executed features such as Prepayment, Foreclosure, and OD request options, along with service request functionalities for seamless customer interaction and service management.
- **Collaborated** with cross-functional teams in an **Agile** environment, ensuring timely delivery and deployment of features, leading to a **25% reduction** in development time for new modules.
- Integrated Payment Gateway.

Education

Post Graduate Diploma in Advanced Computing (PG-DAC) **2022**

Bachelor of Engineering, North Maharashtra University - Dhule, India **2017 - 2020**
