JUBIN MARIYA JOY

Python Full Stack Developer

jubinmariyaj@gmail.com 9645907843 linkedin.com/in/jubinmariyajoy

PROFESSIONAL SUMMARY

Python-focused entry-level Full Stack Developer with hands-on internship experience in building Django-based web applications. Skilled in developing scalable, database-driven systems using Django, PostgreSQL, MySQL, and MongoDB. Proficient in implementing RESTful CRUD operations, authentication, MVC architecture, and responsive UI design. Strong backend development, version control using GitHub, and problem-solving skills.

PROFESSIONAL EXPERIENCE

Python Full Stack Developer Intern – IPSR Solutions | 2025

- Developed and maintained backend modules using Python and Django across 5+ application modules following MVC architecture.
- Designed, implemented, and optimized database models and queries using Django ORM with PostgreSQL for efficient data management.
- Built RESTful API endpoints using Django REST Framework to enable seamless frontend–backend communication.
- Integrated responsive frontend components with backend logic using HTML, CSS, and JavaScript.
- Containerized Django applications using Docker to ensure consistent development and deployment environments.
- Assisted in debugging, testing, and performance optimization to improve application stability and response time.
- Used Git and GitHub for version control, collaborative development, feature enhancements, and bug fixes.

SKILLS

- **Languages**: Python
- **Backend**: Django
- **Frontend**: HTML, CSS, JavaScript, Bootstrap, React
- **Databases**: PostgreSQL, MySQL, MongoDB
- **Tools**: VS Code, PyCharm, Git

PROJECTS

Library Management System | Python, Django, MySQL | 2025

- Designed and developed a full-stack Library Management System using Python and Django with a MySQL database.
- Implemented multiple functional modules including students, faculty, courses, and books with complete CRUD operations.

- Automated book issue and return workflows with real-time database updates, reducing manual effort by approximately 40%.
- Optimized database queries using Django ORM to improve data retrieval and application performance.
- Built a responsive user interface using HTML, CSS, and Bootstrap for cross-device compatibility.

Training Institute Management System (TIMS) | Python, Django, PostgreSQL | 2026

- Designed a role-based Training Institute Management System managing 6+ user roles across core institute operations.
- Engineered multi-role authentication and authorization for Student, Faculty, Admin, HR, Manager, and Super Admin with secure role-based redirection.
- Managed user authentication, permissions, and session handling for 10+ test users using Django authentication.
- Developed 4+ core modules including Enquiry, Follow-up, Admission, and Fees Structure with full CRUD functionality.
- Streamlined enquiry tracking and follow-up processes to support improved admission management.
- Configured a structured fees management system supporting fee plans, installments, and payment tracking.
- Optimized relational database models using Django ORM to enhance query performance and scalability.
- Applied MVC architecture and backend best practices to maintain clean, modular code.

EDUCATION

Bachelor of Pharmacy (B.Pharm) Mount Zion College of Pharmacy, Adoor 2018 – 2023

CERTIFICATES

Python Full Stack Develpoment with internship-IPSR Solutions
