PROFESSIONAL SUMMARY

Aspiring **Python Backend and Full Stack Developer** with over **1 year of hands-on experience** in web development. Skilled in **Python/Django, REST API development, and PostgreSQL/MySQL**, with strong expertise in building scalable backend systems and integrating full stack solutions. Key achievement includes **reducing manual task processing by 30% through automation and optimized APIs** during training projects. I am seeking a role in **technology-driven companies or startups** where I can contribute to building impactful applications while expanding my expertise in modern web development and emerging technologies like AI and automation.

WORK EXPERIENCE

Technical Team Volunteer – BAPS Stabdi Mohtsov **Nov 2022 – Feb 2023**

- Supported **digital registration and attendee management systems** using database and software tools.
- Assisted in **troubleshooting software applications and event management platforms** during live events.
- Coordinated deployment and maintenance of **IT systems and software workflows**, ensuring smooth technical operations.

PROJECTS

iStudio – Interior Design Task Scheduling System | Django, REST APIs, PostgreSQL

- Developed a **backend module for managing interior design tasks**, including client requests, designer assignments, and project timelines using Django and REST APIs.
- Designed and optimized **PostgreSQL database schemas** to track project details, deadlines, and task status efficiently.
- Implemented workflow automation for task updates and notifications using Python scripts, improving **task management efficiency**.

Level Up – Django Blog Platform | Django, HTML, CSS, JavaScript

- Built a **full stack blogging platform** with user authentication, role-based access, and CRUD functionality.
- Integrated search and filtering features for blog content, enhancing **user experience and accessibility**.
- Optimized database queries using Django ORM, improving **application performance and response times**.

Multi Vendor eCommerce System | Django, REST APIs, PostgreSQL, React

- Developed a **scalable multi-vendor eCommerce backend** supporting product catalog management, cart operations, and order workflows.
- Designed REST APIs and a modular backend structure to ensure **future scalability and frontend integration** with React.
- Implemented authentication and vendor management features to handle multiple sellers efficiently.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Engineering ***Jun 2023 – 2027***
LDRP Institute of Technology & Research, Gandhinagar

Higher Secondary (12th Grade) ***May 2023***
Divine Buds English School, Ahmedabad

SKILLS

Backend Development: Python, Django, REST APIs
Databases: PostgreSQL, MySQL
ORM: Django ORM, SQLAlchemy
Frontend: HTML, CSS, JavaScript, React
Other Technologies: Java, Spring Boot (basic)]
Testing: unittest, pytest
Methodologies: Agile, Scrum
Containerization: Docker (basic), Kubernetes (familiar)
Tools: Git, GitHub

CERTIFICATIONS

- Python (Basic) Certification – HackerRank
- SQL for Developers – HackerRank
- Python for Data Science – NPTEL
- 14-Day Databricks AI Challenge – CodeBasics *(AI, Data Engineering, Python, Data Processing)*
- Flipkart GRiD 6.0 Certificate

ACHIEVEMENTS

- Completed **14-Day Databricks AI Challenge – CodeBasics**, gaining hands-on experience in **Python, data processing, and AI/ML concepts**.
- Earned **Flipkart GRiD 6.0 Certificate** for demonstrating **problem-solving and technical aptitude** in a competitive environment.
- Participated in **Smart India Hackathon (SIH)** and a **college-level hackathon**, developing innovative solutions and showcasing **teamwork and rapid prototyping skills**.
