Nikhilraj M

Python Developer

nikhilremesan@gmail.com| http://www.linkedin.com/in/nikhilraj-m-193158351|Kannur,Kerala|+91 9778111515

SUMMARY

Passionate Python Developer with hands-on experience in building web applications and working with databases. Strong understanding of object-oriented programming, Django, and REST APIs. Committed to writing efficient, maintainable code and eager to contribute to innovative projects while expanding technical expertise.

WORK EXPERIENCE

IROHUB INFOTECH — Ernakulam,Kerala
Python Developer Intern — Apr2025 -Oct2025

- Completed a 6 month training and internship in Python and Django development at Irohub Infotech.
- Built and maintained web applications using Python, Django, HTML, CSS, Bootstrap, and JavaScript.
- Gained hands-on experience in REST API integration, database management, and user authentication.
- Collaborated in real-time projects, applying problem-solving skills and writing clean, maintainable code.

SKILLS

Language : Python
Frontend : HTML,CSS,JavaScript,Bootstrap
Backend : Django,REST APIs
Database : SQLite,MySQL
Platforms : GitHub,Postman

PROJECT EXPERIENCE

Library Management System

The Library Management System is a comprehensive web-based application developed to efficiently manage and organize various library operations. The main goal of this system is to automate traditional library activities and minimize manual work, making the process of maintaining and accessing records more efficient and reliable.This system helps in maintaining detailed records of books, members, issued books, returned books, and due dates in a structured digital format.

Tools & Technologies Used: Python,Django, HTML, CSS, Bootstrap, JS and SQLite

Accident Detection System

Developed a web-based Accident Detection System using Python and Django, integrating machine learning algorithms for accident prediction and alert generation. The system includes modules for real-time monitoring,user notifications, and data management, helping to improve road safety through automated detection and faster response mechanisms.

Tools & Technologies Used: Python, Django, HTML, CSS, Bootstrap, JS, Pandas, NumPy and SQLite

Object Detecting Robot

Developed an object-detecting robot using Arduino with integrated sensors and control logic.Implemented obstacle detection and navigation features, combining hardware programming with C/C++ and frontend interface using CSS for monitoring and basic control visualization.

EDUCATION

College of Applied Science — Kannur,Kerala
BSc.Computer Science,Kannur University — Graduation Date: Apr 2025
