OBJECTIVE

Python Developer with 2 years of professional experience in Python and SQL, experienced in backend development, data handling, and automation. Seeking Python-based roles in application development, data processing, or backend systems.

KEY SKILLS

- **Programming & Tools**
  Python, SQL, PostgreSQL, MySQL, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Git, GitHub, Power BI, HTML, CSS, JavaScript
- **Data & Analytics**
  Data Cleaning & Preprocessing, Handling Missing Values, Exploratory Data Analysis (EDA), Feature Encoding & Scaling, SQL Querying, Data Visualization, Baseline Predictive Modelling
- **Machine Learning (Foundational)**
  Linear & Logistic Regression, KNN, SVM,
  Model Evaluation (Accuracy, Precision, Recall, F1, MAE, RMSE)
- **Soft Skills**
  Analytical Thinking, Problem Solving, Adaptability, Collaboration, Continuous Learner

WORK EXPERIENCE

Ajax Media Tech — **Chennai, India**
Engineer Trainee (Python / ERP Development) — June 2022 – May 2024

- Developed and customized payroll, attendance, and shift management modules using Python, JavaScript and the Frappe framework to streamline HR workflows for multiple clients across three projects, resulting in a 30% reduction in manual payroll processing through automation.
- Led the migration of financial and employee data from Odoo ERP to ERPNext using Python and SQL, ensuring data integrity and improving data consistency while reducing processing errors by 15%.
- Designed and implemented ERPNext dashboards for real-time tracking of employee attendance and leave metrics, enabling stakeholders to access key operational insights.
- Automated the creation of detailed salary, loan, and attendance reports using Python and SQL to enhance operational insights.
- Provided ongoing technical support to clients, resolving over 90% of issues within Service Level Agreement, and collaborated with team leads to deliver tailored solutions.
- Worked with structured business data to support reporting, analysis and operational decision-making using Python and SQL.

PROJECTS

- **House Price Prediction with Loan Approval**
  Technologies: Python, Pandas, NumPy, Scikit-learn
  • Performed EDA, missing value treatment, and feature encoding using Pandas.
  • Trained baseline regression and classification models using scikit-learn.
  • Evaluated models using MAE, RMSE, accuracy and confusion matrix.

- **Placement Eligibility App (Eligify)**
  Technologies: Python, Pandas, MySQL, Streamlit
  • Built a data-driven application to assess student placement readiness using academic, programming, and soft-skill metrics.
  • Designed MySQL schemas and SQL queries for student performance analysis.
  • Performed data cleaning and feature preparation using Pandas.
  • Developed an interactive Streamlit dashboard for filtering and insights.

- **Cricsheet Match Analysis**
  Technologies: Python, Pandas, SQL, Selenium, Matplotlib, Seaborn, Power BI
  • Built an end-to-end sports analytics pipeline by scraping cricket match data from Cricsheet.
  • Transformed raw JSON data into structured SQL tables.
  • Performed exploratory data analysis (EDA) using Pandas.
  • Visualized team and player performance trends using Python plots and Power BI dashboards.

CERTIFICATIONS & COURSES

Programming for Everybody (Python Basics)	**Coursera**
AI for Everyone	**Coursera**
Python for Machine Learning & Data Science Masterclass	**Udemy**
Artificial Intelligence And Machine Learning Program	**GUVI**

EDUCATION

VELS University — **Chennai, India**
BE in Computer Science Engineering (CGPA:7.42) — May 2022
