KAIBALYA NAYAK

PYTHON FULL-STACK DEVELOPER

6370794126 kaibalya.na@gmail.com www.linkedin.com/in/kaibalya-nayak

SUMMARY

As a passionate software enthusiast, I thrive on transforming innovative ideas into functional code. Proficient in languages like Python and JavaScript, I'm driven by a relentless curiosity for learning and problem-solving. Eager to contribute to impactful projects and collaborate with like-minded professionals. Let's connect and explore the possibilities of creating cutting-edge solutions together

WORK EXPERIENCE

Company: RCV Innovation Pvt. Ltd (10/2024 – Present)

Role: Python Developer

Projects:

❖ **DaaS (Desktop as a Service):**

Desktop as a Service (DaaS) platform that enables users to securely access virtual desktops and applications from any device via the cloud. The solution was designed to provide scalable, on-demand desktop environments for enterprise clients.

Roles & Responsibilities:

- Developed and maintained full-stack applications using Python for backend and React.js for frontend.
- Built RESTful APIs through FastAPI and integrated them with frontend components.
- Designed database models using PostgreSQL, InfluxDB and SQL Alchemy and pydentic to manage.
- Implemented user authentication, authorization, and data validation features with KEYCLOAK, guacamole.

Technologies:

- Python, Django, React.js, HTML/CSS, JavaScript, PostgreSQL, Git, Docker, Kubernetes, InfluxDB, FastAPI, Keycloak, guacamole, APISIX.

❖ **DaaS Health (Mobile Application):**

An Android application designed to provide users with secure, seamless access to health monitoring and management services on the go. The app integrates with cloud services to deliver real-time data and notifications, enhancing remote healthcare delivery and patient engagement.

Roles & Responsibilities:

- Developed the mobile app using Flutter, ensuring a responsive and intuitive user interface across Android and web.

- Integrated RESTful APIs built with FastAPI to communicate with backend services and cloud infrastructure.
- Implemented secure user authentication and authorization mechanisms, integrating with Keycloak for identity management.
- Worked on real-time data synchronization with cloud databases to provide up-to-date health metrics and alerts.
- Deploy the supporting APIs and services on Kubernetes clusters.

Technologies:

- Flutter, Dart, FastAPI, Python, RESTful APIs, Keycloak, Kubernetes, Docker, Git

❖ **Thinkcloud Server Manager (Mobile Application):**

This is an Android-exclusive mobile application designed specifically for system administrators to efficiently manage and monitor cloud servers on the go. The app provides secure, real-time access to critical server metrics and administrative controls, helping streamline operational tasks.

Roles & Responsibilities:

- Developed the Android application using Flutter, focusing on optimized performance and usability for administrative tasks.
- Integrated with backend services via FastAPI to retrieve server status, manage resources, and execute administrative commands.
- Implemented secure authentication and role-based access control using Keycloak to ensure only authorized administrators can access sensitive functionalities.
- Designed and implemented real-time alerts and dashboards to monitor server health and performance metrics.
- Collaborated with backend and DevOps teams to deploy and maintain supporting infrastructure using Kubernetes and Docker.

Technologies:

- Flutter (Android), Dart, FastAPI, Python, REST APIs, Keycloak, Kubernetes, Docker, Git

❖ **Custom S3 Browser (Android Application):**

A custom S3 Browser Android application that interfaces with the company's internal database to retrieve and display data stored in MinIO object storage. This solution enables secure and efficient access to cloud files while incorporating company-specific metadata for enhanced organization and management.

Roles & Responsibilities:

- Built the Android application using Flutter, focusing on optimized performance and user experience for Android devices.
- Developed backend services using Python (FastAPI) to synchronize metadata between the company database and MinIO storage.
- Implemented secure authentication and authorization using Keycloak to protect sensitive company data.

- Designed intuitive UI components to display combined database metadata and MinIO file information for seamless file management.
- Collaborated with DevOps teams to deploy backend services on Kubernetes and Docker for scalable and reliable performance.

Technologies:

- Flutter (Android), Dart, Python, FastAPI, MinIO, Company Database (InfluxDB), keycloak, Docker, Kubernetes, Git.

Company: COGNIFYZ TECHNOLOGIES (07/2024 - 08/2024)

Role: Python Developer

Projects:

❖ **Responsive Corporate Website**

A fully responsive and visually distinctive website tailored to meet client specifications, ensuring seamless user experience across desktops, tablets, and mobile devices.

Roles & Responsibilities:

- Utilized HTML5, CSS3, JavaScript, and Python (Django/Flask) to build interactive front-end components and robust back-end functionality.
- Implemented modern design principles and best practices to create a unique and engaging user interface.
- Optimized website performance and ensured cross-browser compatibility for consistent behaviour.
- Collaborated with the design and QA teams to deliver a polished final product within tight deadlines.

Technologies:

- Python, Django/Flask, HTML5, CSS3, JavaScript, Bootstrap, Git

TECHNICAL SKILLS:

- Programming Languages:

  Python, JavaScript, Dart, HTML, CSS

- Frameworks & Libraries:

  Django, FastAPI, ReactJS, NodeJS, Bootstrap, React Native, Flutter

- Databases:

  OracleDB, MySQL, PostgreSQL, InfluxDB, MongoDB

- API Development & Integration:

  REST APIs, APISIX

- Authentication & Security:

  Keycloak, Apache Guacamole

- Version Control:

  Git, GitHub

- DevOps & Tools:

  Docker, Kubernetes

EDUCATION:

- Degree: B.Tech
- University: BPUT, Odisha
- Graduation year: 2023

CERTIFICATIONS:

Python Developer – IT-ITeS Sector Skill Council (SSC NASSCOM)
Issued: February 2023

- Successfully cleared the Python Developer Assessment aligned with the competency standards developed by the IT-ITeS Sector Skill Council (SSC NASSCOM).
- Awarded the Gold Badge, demonstrating strong proficiency in Python development, problem-solving, and software engineering principles.

ACHIEVEMENTS:

***HackerRank* – Python (Gold Badge, 5 stars)**

Earned for advanced problem-solving and programming proficiency in Python.

HackerRank Profile: ***https://www.hackerrank.com/profile/N_kaibalya***

LANGUAGES:

- English (Professional Proficiency)
- Hindi (Full Professional Proficiency)
- Odia (Native)

INTERESTS:

- Chess (strategic thinking & focus)
- Online Gaming (competitive mindset & quick decision-making)
- Trekking (endurance, exploration, and team spirit)
