Muhammad Inshad

MERN Stack Developer

Location: Kerala, India | **Phone:** +91 7025034758 | **Email:** minshad430@gmail.com

GitHub: muhammad-inshad | LinkedIn: muhammad-inshad | LeetCode

Professional Summary

Self-taught **MERN Stack Developer** with a deep passion for engineering scalable and secure full-stack web applications. Expert in **Node.js backend architecture**, **React.js frontend optimization**, and **RESTful API** design developed through rigorous independent study and project-based learning. Proficient in implementing **JWT and OAuth** security protocols and managing **MongoDB** and **PostgreSQL** databases. Strong foundation in **Data Structures and Algorithms (DSA)** applied to optimize system performance.

Technical Skills

Languages:	JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL
Front-end:	React.js, Redux Toolkit (RTK), Tailwind CSS, Bootstrap
Back-end:	Node.js, Express.js, RESTful APIs, Middleware Architecture
Databases:	MongoDB (NoSQL), PostgreSQL (SQL)
Cloud/DevOps:	AWS (EC2, S3), GitHub Actions, Vercel, Render
Core Concepts:	OOP, SOLID Principles, MVC Architecture
Tools:	Git, GitHub, Postman, Visual Studio Code

Technical Projects

MedSync — Healthcare Management Platform **(Ongoing)**

MERN Stack, JWT, Google OAuth

- Engineering a secure authentication system using **JWT and Google OAuth** to protect patient data.
- Architecting high-performance **REST APIs**, successfully reducing data latency by **30%**.
- Developing real-time healthcare dashboards using **Redux Toolkit** for optimized state management.
- Implementing advanced database indexing and aggregation to improve query response times by **25%**.

MDFurniture — E-Commerce Marketplace

- Developed end-to-end cart, checkout, and order management modules for a seamless user experience.
- Integrated **Stripe Payment Gateway** for secure transactions with 99.9% success rates.
- Designed a centralized admin dashboard for real-time inventory tracking and management.

Carbond — Car Sales Marketplace

React, Express, Tailwind CSS

- Built an advanced search and filtering engine to handle complex automotive inventory queries.
- Implemented custom authorization logic to manage buyer and seller permissions effectively.
- Optimized API responses to significantly reduce server load by 40% during peak traffic intervals.
- Achieved a **95+ Lighthouse performance score** through image optimization and lazy loading.

Education

Bachelor of Computer Applications (BCA) **Aug 2021 – May 2024**

University of Calicut, Kerala, India

KEY ACHIEVEMENTS

- **Problem Solving:** Solved **140+ problems** on LeetCode with a focus on algorithmic efficiency and data structures.
- **Open Source:** Actively contributing to GitHub repositories and building open-source tools to solve real-world problems.
- **Continuous Learning:** Independently mastered modern web technologies including TypeScript, AWS,
