- **Django**
- **React**
- **Mysql**
- **sql**
- **HTML**
- **CSS**
- **Javascript**
- **AI using integration for development**
- **AIAD**

Fresher

- **Skilled in backend development using Python frameworks like Django and Flask. Trained in Python programming with knowledge of full-stack development using Django, Flask, HTML, CSS, and JavaScript.**
- **Detail-oriented and responsible, focused on delivering accurate results and clean, efficient code.**
- **Eager to apply data management and programming skills to build web applications and grow as a full-stack developer**

EDUCATION

Secondary School Certificate: 06/2019
GOVERNMENT HIGHER SECONDARY SCHOOL - Tamil Nadu, Chennai
Completed Secondary School Certificate

Bachelor of Science: Computer Applications, Expected in 05/2026
Hindustan College of Arts And Science - Tamil Nadu, Chennai
Bachelor of Computer Applications

Higher Secondary Certificate: 05/2022
GOVERNMENT HIGHER SECONDARY SCHOOL - Tamil Nadu, Chennai
Completed Higher Secondary Certificate

PROJECTS

ETHICAL HACKING LEARNING PLATFORM WITH AI ASSISTANT
Learning website - html,css.javascripts,django.react.sql.python
January 2026-January 2026
Ethical Hacking Learning Platform with Al Assistant

- Full-Stack Developer | Python, Django, JavaScript, Al Chatbot | Jan 2026 | GitHub | Live Demo
- Built full-stack web app using Django backend to simulate ethical hacking vulnerabilities (SQLi, XSS) in a safe, interactive demo
  environment for educational purposes.
- Integrated Al chatbot for real-time user interactions, providing vulnerability explanations, pentesting tips, and learning guidance via natural language processing.
- Designed professional, responsive Ul with vulnerability visualizations and live demos to enhance user engagement and learning experience.
