Professional Experience

March 2022 - April 2023

Developer Kumaran System Pvt Ltd.

Credit Form Management System(CFM) :

It is a credit form management system in which Json will be provided. Json will have all metadata for credit form. Dynamic credit form will be created and managed based on JSON. Reusable components is created using Angular with dynamic Validation and Functionalities. Layouts and styled are also applied dynamically. We Created Dynamic components with Angular. We used Java for API.

Roles And Responsibilities :

- Based on client requirements need to implement some extra Features in CIBC BANK Application.
- Based on the Document we need to develop the Application.
- I have worked in enhancing the existing application through Angular 11 & API.
- Worked on unit testing of the development and defect fixations.
- I have supported in Production Logs.
- It is a credit form management system in which Json will be provided.
- Based on Json dynamic credit form will be created .
- If any change made in metadata it will reflect in the UI side.
- we can create the credit with two form like CEAS and ICap.
- I work on CEAS to create the credit in multiple steps like customer Details, Loan Details etc.
- If customer suggest to change on the UI part like(customer profile, types of loan details etc) I have to change on that.
- And I have work on Manual testing for credit Form management for CEAS side defect can be identified or not.
- Defect is identified We have to work on that credit page.
- In UI part we have to check with different types of scenarios the credit will be work properly or not.
- Developed web applications for deployment on platforms and sites.
- Prepared detailed reports on updates to project specifications, progress, identified conflicts, and team activities.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability, and performance.

May 2021 - February 2022

Developer Kumaran System Pvt Ltd.

SSRS Report Migration Project:

Based on the customer requirement need to migrate the report using Power BI with Report Builder Tool.I have to migrate the Crystal report into Power BI Reports.Based on the crystal report we need to develop the report using Power BI.

Roles And Responsibilities :

- Analyzed and designed software and database solutions.
- Performed daily tasks including backup and restore by using SQL Server 2012 tools like SQL Server Management Studio, SQL Server Profiler, SQL Server Agent, and Database Engine Tuning Advisor.
- Created and managed stored procedures, indexed views, user defined functions, triggers, database constraints to meet business requirements and policies.
- Developed reports and visualizations using Tableau Desktop as per the requirements.
- Created Crystal Reports Repository objects (Reports template, commands).
- Developed custom reports using SSRS/Power BI.
- Designed, Managed and published various reports using SQL Server Reporting Services 2012 and Power BI.
- Migrated and translate legacy reports into Power BI from SSRS environment.
- Involved in development and implementation of SSIS and SSRS application solutions for various business units across the organization.
- Developed number of business oriented reports utilizing SSRS, Power Bl and Tableau.
- Created venous complex reports and manage those using SQL Server Reporting Services (SSRS 2008/2005) according to ERLC.
- Created multiple data visualization solution for initial Power BI environment business preview.
- Involved in migration and Conversion of Reports from SSRS.
- Highly involved in creating structuring formatting using Report Designer and Report Builder.
- Wrote and integrated stored procedures to generate the special reports according to client's need.

June 2025 - present

Dharan Natural Stone Park.
