Yogesh Mishra

Full Stack Web Developer | React.js & Node.js

+91-7410730220 | yogeshrmishra3@gmail.com | Nagpur, Maharashtra

SUMMARY

- React and Next.js developer with 1+ years of hands-on industry experience in building full-stack web applications.
- Skilled in creating responsive, high-performance, and SEO-friendly interfaces using modern tools like Tailwind CSS, TypeScript, and JavaScript.
- Experience deploying scalable applications on platforms like AWS and Vercel, ensuring performance and security.
- Strong knowledge of both frontend and backend development, including REST API integration and database management with MongoDB and MySQL.

SKILL

Technical Skills

- Frontend: HTML, CSS, JavaScript, React.js, NextJS,Tailwind CSS, Bootstrap
- Backend: Node.js, Express.js, Java
- Database: MySQL, MongoDB, Firebase
- Deployment & DevOps: Vercel, Render, Docker, CI/CD Basics
- Architecture & Concepts: Microservices Architecture, API Integration
- Tools & Platforms: GitHub, Postman, Microsoft Office
- Operating Systems: Windows, Basic Linux

WORK EXPERIENCE

React Developer

May 2025 – Current

CONVOMAX

Nagpur, MH

- Built responsive and scalable web applications using React, Next.js, Tailwind CSS, and JavaScript, with a focus on clean design and smooth user experience across devices.
- Developed backend services using Node.js and Express.js, and integrated MongoDB along with REST APIs to manage data efficiently.
- Improved SEO in Next.js projects through server-side rendering and proper meta tag setup, which helped increase visibility on search engines.
- Deployed applications using platforms like Vercel and AWS, ensuring performance, security, and availability even during traffic spikes.
- Started working with TypeScript in recent projects to write cleaner, more reliable code and improve long-term maintainability.

Web Developer

October 2024 – May 2025

TARS TECHNOLOGY

Nagpur, MH

- Developed scalable and responsive web applications using Next.js, React.js, HTML, CSS, and JavaScript, ensuring a seamless and interactive user experience.
- Built and optimized backend services using Node.js and Express.js, integrating RESTful APIs for efficient data exchange and improving overall application performance.
- Enhanced database efficiency by optimizing MySQL and Firebase with stored procedures, triggers, indexing, and real-time synchronization for faster and smoother operations.

- Deployed and managed applications on cloud platforms like AWS and Vercel, ensuring scalability, security, and high availability across different devices and user loads.

Java developer Intern — November 2023 – June 2024

Softronix IT solutions — Nagpur, MH

- Developed and maintained web applications using Java, J2SE, J2EE, MySQL.
- Collaborated with a cross-functional team to develop and enhance web applications using HTML, CSS and JavaScript.
- Optimized database queries by creating stored procedures and triggers.

PROJECTS

Enterprise Institutional Website | ADANI–DMIHER Group

Developed a full-featured web application to streamline and digitize institutional operations.

- Architected and delivered a large-scale, dynamic institutional web platform for the ADANI–DMIHER Group, enabling digital transformation of academic and administrative operations.
- Developed a full-featured, scalable web application with a modern and accessible UI using React.js and Tailwind CSS, ensuring high performance and consistency across the platform.
- Implemented SEO-driven architecture (React Helmet) along with responsive and cross-browser optimization to enhance visibility and deliver a seamless experience across all devices..

ERP Software

Built a full-stack ERP system for Institution to manage academic and administrative tasks more efficiently.

- Developed a secure backend with Node.js & Express.js, using JWT authentication and REST APIs for handling users, attendance, and resources.
- Designed a scalable MongoDB database to manage large volumes of school data.
- Created a responsive React.js frontend with Tailwind CSS for an intuitive staff dashboard.
- Ensured cross-device performance optimization for smooth access on web and mobile.

SIMS – School Inventory Management System

Developed a School Inventory Management System to simplify how institutions manage stock, supplies, and resources.

- Built the backend with Node.js & Express.js, including APIs for product entry, stock updates, and order tracking.
- Implemented JWT-secured authentication to protect transactions and access.
- Used MongoDB for reliable, scalable storage of inventory and transaction data.
- Developed a responsive React.js frontend styled with Tailwind CSS for quick, user-friendly inventory control.
- Enhanced performance with real-time updates and optimized data handling, ensuring schools can track resources effortlessly.

CRM Application for an IT Organization

Developed a CRM application with both frontend and backend functionality to streamline business operations.

- Built a clean and intuitive UI using React.js and Tailwind CSS.
- Integrated APIs for seamless data exchange and ensured secure storage with MongoDB.
- Optimized performance for cross-browser compatibility

E-Commerce Portal (Neutron)

Developed an E-Commerce web application to enable institutions and individuals to browse, sell, and purchase products online.

- Built the backend with Node.js & Express.js, implementing APIs for product listing, cart, orders, and payments.
- Integrated JWT-secured authentication for buyers and sellers.
- Designed and structured the MongoDB database for products, users, and transactions.
- Created a modern React.js frontend with Tailwind CSS for a smooth shopping experience.
- Optimized the portal for speed, responsiveness, and scalable multi-user support.

EDUCATION

Priyadarshini J L College of Engineering
July 2020 - August 2024

Bachelor of Engineering – Electronics and Telecommunication

Shri Umiyashankar Narayanji Junior College
July 2019- August 2020

HSC(12th Standard) - General Science

DECLARATION
