Objectives

Motivated professional seeking new opportunities to leverage my skills and contribute to a dynamic organization. Eager to grow within a collaborative environment, where I can develop my expertise and contribute to company success.

Education

LBS College of Engineering — Povval, Kasaragod, Kerala
Bachelor of Technology in Electronics and Communication — *Oct. 2021 – Apr. 2025*

Navajeevana HSS — Badiadka, Kasaragod, Kerala
Plus Two — *Mar. 2019 – Mar. 2021*

Kunil Educational Institute — Badiadka, Kasaragod, Kerala
10th — *Mar. 2007 – Mar. 2019*

Work Experience

IoT Intern — Keltron Knowledge Centre — Sept. 2023

- Assisted in the development and testing of IoT prototypes involving microcontrollers (Arduino, ESP32) and sensors(Soil Moisture Sensor,Rain Sensor,Ultrasonic Sensor,IR Sensor,etc.)
- Supported the integration of hardware with web dashboards for real-time monitoring
- Collaborated with a team to debug connectivity issues and optimize sensor data accuracy
- Documented circuit diagrams and system flow for final project reports

Projects

Eventify – Event Booking Platform — 2025

- **Tech Stack**: Django , Django REST Framework , React.js , Tailwind CSS , SQLite , JWT
- Developed a full-stack web application that enables users to discover and book events in real-time. Built secure authentication with JWT, responsive UI using React and Tailwind CSS, and a RESTful backend with Django. Implemented admin features for creating events with image uploads, date/time input, and seat management. Integrated booking validation to prevent overbooking and unauthorized access.
  Key Contributions:
  - Designed and implemented user & admin flows for event creation and booking.
  - Built reusable REST APIs and integrated them with a modern React front-end.
  - Ensured responsiveness and clean UX across all device sizes.
  - Used GitHub for version control.

SkillSpark – Learning Platform — 2025

- **Tech Stack**:Next.js, React.js,Tailwind CSS , Node.js, Express.js, MongoDB, JWT Auth ,REST API, Mongoose, Redux, Postman ,Bcrypt, Express Middleware,Git
- SkillSpark is an end-to-end learning management system designed to deliver daily structured lessons, interactive quizzes, and skill-based progress tracking.
  - Developed the frontend using React.js and Next.js with Tailwind CSS, implementing responsive UI, protected routes, and dynamic content rendering.
  - Built a robust backend with Node.js, Express, and MongoDB, using RESTful APIs and JWT authentication for secure user and admin access.
  - Integrated core features such as user registration/login, XP-based progression system, lesson/quiz management, and role-based access control.
  - Applied middleware for token validation, centralized error handling, and modular controller/service structure for clean, scalable architecture.
  - Enabled seamless API testing and documentation using Postman, and followed production-ready practices including .env configuration, bcrypt password hashing, and Mongoose schema validations.

Automated Pharmacy Assistant System | *MERN, ESP32* 2025

- Developing an Automated Pharmacy Assistant System integrating software and hardware to streamline medicine dispensing in government hospitals.
- The software, built using the MERN stack, enables doctors to prescribe medicines, pharmacists to validate prescriptions, and patients to track their orders.
- The hardware system features a vending machine that dispenses medicines automatically once validated by the pharmacist, reducing waiting times for elderly and diabetic patients.
- Technologies used : MongoDB, Express, ReactJs, NodeJs, ESP32,Stepper Motor

Technical Skills

Programming Languages: Python, Java, C, JavaScript, SQL, HTML, CSS, Javascript,Embedded C

Frameworks & Libraries: React, Next.js, Node.js, Django, Pandas, NumPy, Matplotlib

Databases: MySQL, MongoDB, Firebase

Developer Tools: Git, VS Code, PyCharm, IntelliJ IDEA, Eclipse, Arduino IDE, Postman, Insomnia

Languages

English , Malayalam, Hindi, Tamil, Arabic
