Experience

Coreco Technologies Private Limited **July 2024 – March 2025**
Software Engineer Intern *Pune*

- **Project: ParkEZY, Wipro Pari**
- **Frontend:** Developed interactive, mobile-responsive UIs using React.js, TypeScript, Redux Toolkit, HTML5, CSS3, and Ant Design.
- Managed complex application state using Redux Toolkit and asynchronous data flows with Thunk.
- Integrated dynamic UI components aligned with modern UX standards to improve usability and user engagement.
- **Backend**: Developed robust and scalable RESTful APIs using Node.js, Express.js, and TypeScript to handle core functionality such as parking slot management, user booking, and admin workflows.
- Managed relational data using MySQL and Sequelize ORM, including schema design, migrations, and optimized query execution.
- **Testing:** Wrote unit and integration tests for API routes and UI components using Jest and React Testing Library.
- **Security and Performance:** I used strong encryption, set up role-based access control, and improved the backend to make it faster and handle more users at the same time.
- Built secure authentication and authorization mechanisms using JWT and RSA encryption, ensuring safe user access and encrypted data exchange.

Technical Skills

Languages and primary skills: JavaScript and its frameworks, Typescript, HTML/CSS, SQL, J2EE,(Core Java)
Data Structures and Algorithms: Arrays, strings, searching and sorting, and problem-solving techniques
Frontend: React JS, Redux, Redux Toolkit, Next Js, HTML 5, CSS 3, Bootstrap, Tailwind CSS, Material UI, JavaScript, TypeScript.
Backend: Node.js, Express.js, JavaScript, TypeScript, MongoDB, MySQL, PostgreSQL, REST, RESTful APIs, SOAP APIs, GraphQL, JWT, Socket.io, WebSockets, Docker.
Libraries and Tools: jQuery, jQuery UI , XML, APIs, Git , GitHub, Firebase beginner.
Testing: Testing Jest, React Testing Library, Mocha, Chai.
Software Engineering toolsVCS(Visual Code Studio), Git and GitHub.
Operating Systems: Windows
Databases: MySQL, MongoDB, PostgreSQL, SQL, NoSQL
SDLC Methodologies: Agile, Scrum

[Certificates] Training

UI Full Stack Web Development, React Js **July 2023 – February 2024**
Naresh IT Software Training Institute of Hyderabad *Ameerpeth, Hyderabad*

- This is a training course on UI Web development and related technologies. The course covers topics, including HTML5, CSS3, Bootstrap, JavaScript, React, TypeScript, Node.js, Express.js, MongoDB, jQuery, AJAX, and ReactJS. The course will teach students how to create responsive web pages, and work with RESTful services., JSON, RXJS, and debugging tools like Firebase.
- The course will teach students how to create responsive web pages, and work with RESTful services., JSON, RXJS, and debugging tools like Firebase. using IDEs like Visual Studio Code.

Python, Artificial Intelligence and Machine Learning Internship
Prygma Information Systems LLP, Maharashtra, India

- Acquired hands-on experience with Python frameworks and libraries including Django, Flask, and TensorFlow, enabling the development of robust, scalable, and AI-powered applications.
- Collaborated with cross-functional teams to debug and optimize code performance, ensuring high reliability and maintainability.
- Strengthened skills in software development, problem-solving, and project collaboration, laying a strong foundation for a career in full stack and AI-driven solutions.

Core Java Programming **Ongoing**
Learning

- Learning Java fundamentals including OOP concepts, collections, exception handling, and multithreading.

Education

Institute: DKTE's Textile & Engineering Institute, Ichalkaranji **Jun 2020 – July 2023**
Major: Bachelor of Technology (B.Tech) Electronics and Telecommunication *CGPA:6.6*

Shree Datta Polytechnic College **Jun 2018 – May 2020**
Diploma in Electrical Engineering *CGPA:83.63*

Projects

AI-Powered Assistant | *React, Node.js, Express, Gemini AI, MongoDB,JavaScript,JWT* **GitHub Link**

- Developed a full-stack AI assistant application featuring a responsive React frontend and a robust Node.js/Express backend.
- The application integrates Google's Gemini LLM (Large Language Model) for advanced Natural Language Processing (NLP), enabling intelligent chat interactions and contextual understanding through large language model capabilities.
- Implemented secure JWT authentication, real-time voice communication between ai and human.
- Backend offers RESTful APIs for voice chat and user management, while the frontend uses React Hooks and Context API for efficient state management.
- The application includes features like message history, typing indicators, and responsive design for all devices.

Books-management-tool | *React, JavaScript, Node, Express,Firebase* **GitHub Link**

- List of books with basic details, in a tabular format. Book Title, Author, Type of Book (Auto-biography, Novel, Stories, Poems), Genre of Book (History, Science, Arts, Science Fiction), Publication, No of Pages, Price of book. Each book should have a cover photograph uploaded o Have master tables for Type of Book and Genre of Book.
- Implemented MVC architecture to separate concerns and make the application more modular and easier to maintain.
- Used Express.js to handle routing (Controller), MongoDB for the data storage (Model), and React for the front-end (View).

Video-tutorial-Project | **GitHub Link**

- Designed a Video Library like YouTube application that allows admin to upload, modify and delete videos. Customer can watch videos after register and login.
- Processed user inputted information in the back-end of the app to return a subtotal price based on the tickets selected.
- Utilized the layout editor to create a UI for the application in order to allow different scenes to interact with each other.

Weather App | *React, Typescript* **GitHub Link**

- This project is developed using React and TypeScript, and it focuses on fetching and displaying real-time temperature data. The application connects to a weather API to retrieve current temperature information based on the user's location or a selected city.
- The data is then dynamically rendered on the screen, providing an interactive and responsive user interface. The use of TypeScript ensures strong typing and enhances code reliability and maintainability.

News-Page-Project | **GitHub Link**

- A News API is a way for developers to access up-to-date news articles and information from a variety of sources.
- It's like a search engine for news, but instead of having to manually scour the web for the information you need, the API does it for you!.

Facebook-Clone | ***Live Link*** **GitHub Link**

- This is a Facebook clone project using ReactJS, this have an features of an authorization.

Academic Projects

- Smart medicine serving robot using 8052 Microcontroller : (Engineering Final year Project) **GitHub**
- **Event Coordinator** in DKTE TECH-SYMPOSIUM 2K22
- Raspberry Pi Programming Workshop

Leadership / Extracurricular

- Artificial Intelligence and Machine Learning 7 April 2021 - 12 April 2021
- **Event Coordinator** in DKTE TECH-SYMPOSIUM 2K22
- Raspberry Pi Programming Workshop
