Mutturaj Nilugall

+91 6362303543 | Bengaluru, KA

mutturajnilugalla123@gmail.com | LinkedIn | GitHub

Professional Summary

Full Stack Developer with hands-on experience in building responsive web applications and dashboards using modern frontend and backend technologies. Proficient in Python (FastAPI, Flask), SQL, HTML, CSS, JavaScript, and shadcn/ui. Experienced in API integration, authentication workflows, containerization with Docker, and version control using Git/GitHub. Strong problem-solver with analytical thinking skills and a collaborative mindset. Actively seeking opportunities to contribute to scalable, user-focused software solutions.

Education

Bachelor of Engineering in Artificial Intelligence & Machine Learning **2021 – 2024**

Basaveshwar Engineering College, Bagalkot

Skills

- **Backend Technologies:** Python (FastAPI), SQL
- **Frontend Technologies:** HTML, CSS, JavaScript, shadcn/ui
- **Cloud Platforms:** AWS (Basics)
- **Platforms:** Windows, Linux
- **Containerization & Deployment:** Docker
- **Version Control & Collaboration:** Git, GitHub
- **Soft Skills:** Problem-solving, Analytical Thinking, Team Collaboration

Experience

Role:Intern **Apr *2025* – Jul *2025***

Company: GrapheneAI | Location: Bengaluru, India (Hybrid)

Key Responsibilities & Work Summary:

Built full-stack features using Flask (Python) and Jinja2, automated UI tasks with Playwright, developed responsive interfaces using HTML/CSS, integrated JSON for dynamic content, and performed manual testing for UI validation.

IOT Intern **Jul *2023* – Aug *2023***

Sovanna Technologies, Bagalkot

Designed and developed a smart streetlight system using PIR sensors to automate lighting based on motion detection. Integrated with an IoT platform for real-time monitoring and remote control, significantly improving energy efficiency by activating lights only when needed.

Projects

Crop Recommendation System

- Leveraged the Random Forest algorithm to recommend optimal crops based on input data.
- Designed an intuitive web interface for farmers and agricultural experts.
- Deployed the system on Hugging Face for scalability and accessibility.

Streetlight Monitoring System Using IoT

- Implemented automatic streetlight control using PIR sensors to optimize energy usage.
- Enabled real-time monitoring and remote control via an IoT platform.
- Provided performance insights to enhance operational efficiency.

Certifications

- Python Full Stack Developer, Pyspiders
- Python Workshop, IIT Bombay *(Online)*
- NPTEL Certification in Social Networks, IIT Madras
