Jammu Kashmir

Summary

Full-stack Software Engineer building scalable, API-driven web applications with Next.js and ASP.NET Core. Strong focus on clean architecture, authentication and authorization flows, database design with SQL Server, and performance-focused frontend development

Work Experience

Designed and developed full-stack web applications using Next.js and ASP.NET Core Web API- Built secure REST APIs with JWT authentication and SQL Server integration- Delivered real-world solutions for tour, travel, and appointment management systems

Have less Tour & Travel Platform

Next.js, Tailwind CSS, ASP.NET Core Web API, SQL Server

- Developed a full-stack tour booking system with dynamic package listings and booking workflows.
- Built admin panels for package, destination, and trek management.
- Implemented file uploads, form validation, and API-based data fetching.
- Optimized frontend UI using shimmer loaders and component-level performance improvements.

IITM Convocation Management System

Next.js, Tailwind CSS, ASP.NET Core Web API, SQL Server

- Designed and developed a centralized convocation management system to handle end-to-end college convocation operations.
- Implemented student registration and verification workflows, including eligibility checks based on department, course, and academic status.
- Built role-based modules for Admin, Department, and Students, with controlled access using authentication and authorization.
- Developed department-level management features to manage student lists, approvals, and convocation data.
- Designed and normalized the SQL Server database schema to manage students, departments, courses, registrations, and convocation records.
- Built responsive, performance-optimized frontend interfaces using Next.js and Tailwind CSS for student and admin dashboards.
- Implemented API-driven communication between frontend and backend for real-time data updates and form submissions.
- Added validation, error handling, and secure data handling across the application.

TrackDeKashmir Platform

- Tech Stack: Next.js, ASP.NET Core Web API, SQL Server- Built dynamic web interfaces for displaying location-based and tracking information- Implemented secure API communication between frontend and backend

Skills

Backend

NET Core, ASP.NET MVC, C#
Restful API,
Entity Framework,
ADO.NET,

Frontend

React.js,
Next.js,
Typescript
JavaScript,
AngularJS,
ShadCN, Tailwind,
HTML, CSS

Databases

SQL Server,

Version control

Git, GitHub

Microservices Architecture

Clean Architecture

EDUCATION

Bachelor of Computer Applications (BCA)
Iqbal Institute of Technology and Management (I.I.T.M), Srinagar
Relevant Coursework: Data Structures, Database Management Systems, Operating Systems, Software Engineering

LANGUAG

- English (Professional)
- Urdu (Native
