PROJECTS

Title : Global Corpay Cross-Border Payment and Risk Management Solutions

Project Type : Web based Banking Product

Domain : BFSI Payment Domain

Client : Clear2Pay

Environment : Java, HTML, XML, Javascripts, Bootstrap, Web logic Oracle 11i, JIRA

Testing Approach : Manual and Automation

Tools Used : JIRA, POSTMAN API, SQL Developer, WinSCP, SPIRA

Methodology : SCRUM (Agile Methodology)

Role : Junior Software Test Analyst

Description :

It involves Testing of Web based Application. This application is built on top of Open Payment Framework (OPF). Clear2Pay is an innovative payments technology company focused on delivering globally applicable solutions for secure, timely and streamlined payments processing. As a payments moderniser, Clear2Pay actively supports financial institutions globally in meeting their payments unification goals across the entire value chain. Clear2Pay brings bank payment systems and operations up to next generation technology and the next generation's customer demands. Clear2Pay's Open Payment Framework (OPF) enables financial institutions to improve internal payments processing efficiencies whilst at the same time providing their clients with better payment services that are faster, with richer payments related information.
Open Payment Framework offer financial institutions the ability to process payments through a centralized payments engine that utilizes a library of re-useable business services across all payment types (SEPA, Debit, Credit, High Value Payments, Bulk Payments, Remittance, Mobile & UPI payment etc.). The bank can thus combine new services models with existing infrastructures, thereby protecting previous investments whilst gradually moving to a more modern efficient payments environment.
