CAREER OBJECTIVE

Motivated IT undergraduate specializing in Interactive Media with hands-on experience in software development, frontend engineering, UI/UX design, mobile & web applications, system testing, and IT operations. Skilled in React.js, Next.js, Firebase, JavaScript, Python, REST API integration, database management, and Agile methodologies. Proactive team player with strong analytical, technical, and business system understanding, capable of contributing to Software Engineer, Frontend Developer, QA, UI/UX Designer, Business Analyst, and IT support roles.

EDUCATION

BSc (Hons) in Information Technology Specializing in Interactive Media — 2022 – Present

Sri Lanka Institute of Information Technology (SLIIT) — Malabe

GCE Advanced Level | Physical Stream — 2006 – 2019

Sir John Kothalawala National College — Kurunegala

EXPERIENCE

UI/UX Engineer - Internship — 03/2025 – 09/2025

ICIEOS (Pvt) Ltd — Internship

- Caregiver Web Application Designed complete set of UI screens for the platform.
- Participated in client meetings for requirement gathering and professional exposure.

UI Developer - Internship — 08/2024 – 02/2025

SLT Digital Services (Pvt) Ltd — Internship

- User Interface for the National Food Promotion Board website revamped.
- User Interface for the Home and backend of the LAWNET website were redesigned.
- Design the user interface of the SUPREME website.

PROJECTS

Gesture Recognition System for Interactive Quizzes and Object Manipulation
Developed a real-time hand gesture recognition module using Python to enable gesture-based quiz interaction and 3D object manipulation. Implemented palm-based object grabbing and releasing for interactive puzzles, and thumb gestures for True/False quiz responses. The system processes live webcam input using computer vision techniques to support device-free human-computer interaction in an interactive learning environment.

FitConnect - Health & Fitness Appointment Booking Mobile App
Built an Android application with Firebase authentication supporting patient, doctor, and admin roles for appointment booking and management.

Floral Management System
Developed a full-stack web application using the MERN stack with Firebase Google Authentication to manage floral products, customer orders, suppliers, and inventory efficiently.

PROFESSIONAL SKILLS

Programming Languages
Java, Python, JavaScript, TypeScript, Kotlin

Backend & Databases
MySQL, Firebase, Database Management, CRUD Operations

Software Engineering & IT Knowledge
SDLC, Debugging, System Testing, Documentation, Agile

Data & AI Basics
Data Preprocessing, ML Fundamentals, Computer Vision, Python Data Handling

Web & Mobile Development
HTML5, CSS3, React.js, Next.js, Tailwind CSS, Responsive Web Design, REST API Integration

Tools & Platforms
GitHub, VS Code, Android Studio, Figma, draw.io

Business & IT Support
Requirement Analysis, Reporting, Documentation, Stakeholder Communication

KEY COMPETENCIES

- Software & Web Application Development
- Frontend Engineering & UI/UX Implementation
- Mobile Application Development
- System Testing & Debugging
- Data Handling & Reporting
- Business Requirement Understanding
- IT System Support & Documentation
- Agile Team Collaboration
