Rumsha Shaikh

Backend Developer | Python | Flask | SQL | Rest APIs

rumshashaikh2812@gmail.com +91 8652231321 Mumbai, India rumshashaikh12

RumshaShaikh

SUMMARY

Backend Developer with 1.7 years of experience building scalable financial applications. Strong in Python, Rest API development, SQL optimization, and backend system design. Experienced in implementing secure transaction workflows, improving query performance, and delivering production-ready features in Agile environments.

WORK EXPERIENCE

Tata Consultancy Services

System Engineer — Aug 2024 - Present

- Designed and developed REST APIs using Python for fund transfers and recurring payment systems.
- Implemented transaction validation logic including beneficiary checks and limit enforcement.
- Optimized complex SQL queries for high-volume financial data, improving performance and data integrity.
- Developed backend modules for loan eligibility processing and EMI calculations.
- Automated backend test workflows using Python and Selenium, reducing manual testing effort.
- Contributed to production deployments and regression improvements in Agile sprints.

EDUCATION

University of Mumbai | Rizvi College of Engineering

Bachelor of Engineering - 8.53 — Jul 2020 - May 2024

Maharashtra State Board | P.E.S Jr. College

HSC - Science - 75.80 — Sep 2018 - Apr 2020

PROJECTS

Credit Risk Engine - Loan Risk Analyzer — Dec 2025 - Present

Python | SQL

- Designed modular backend architecture enabling easy migration between Python and Java.
- Implemented rule-based risk scoring and SQL-backend data processing.

IntelliML - Automated Machine Learning Tool — Jun 2023 - Mar 2024

Python | Flask | Machine Learning

- Developed a Python package (IntelliML) that facilitates dataset uploads and automates data preprocessing and model creation.
- Allows users to tailor machine learning tasks, delivering the model's pickle file and prediction code.

AI - Chatbot — Aug 2022 - Oct 2022

Python | Flask | NLP

- Designed a Flask and NLP-powered AI Chatbot to streamline customer support, replacing traditional call center operations and offering instant FAQ assistance.
- Implemented an engaging conversional mode with voice recognition technology, elevating user experience and ensuring accessibility in various interaction scenarios.

SKILLS

- **Languages:** Python, SQL, Java, C
- **Backend:** Flask, REST APIs, FastAPI, JWT Authentication, API Integration
- **Database:** MySQL, PLSQL, NoSQL, MongoDB, Query Optimization, Indexing, Joins
- **Automation & Testing:** Selenium Webdriver, AutoIDE, Python Scripting, Postman, Unit Testing
- **Libraries & Frameworks:** Django, Bootstrap, NumPy, Pandas
- **Concepts:** OOP, Data Structures, API Security, Transaction Handling, Agile/Scrum, Version Control
- **Tools:** Git, Linux, Postman, Docker, AWS, CI/CD
