Work Experience At Maitri Tech Solutions - July 2021 to present

I Gaming Software

Fullstack Web App

- Maintained frontend and backend systems for user, admin, and super admin panels using microservices architecture.
- Integrated payment gateways and handled cron job scheduling for tasks such as payouts, leaderboards, and game events.
- Built scalable APIs using GraphQL with a PostgreSQL database, ensuring efficient data handling and performance.
- Collaborated directly with Argentinian clients, managing requirements, feedback, and delivery across international time zones.
- Technology Stack :- React.js, Redux Toolkit, JavaScript, Nodejs, Graphql, PostgreSQL, MUI, Git, WCAG

AI Interviewer

Frontend Developer

- Developed an **AI-powered Interview Platform** featuring two modules — *HR Copilot* for evaluation and *Interview UI* for candidate interaction.
- Integrated **Heygen AI's interactive avatar** to conduct real-time interviews and perform **skill, strength, and weakness analysis** of candidates.
- Implemented a **custom Human Observer System** using **Socket.IO and WebRTC**, enabling live observation and targeted feedback from HR to the AI copilot.

Hotel Management Software

Fullstack Web App

- **Description:** Worked as a Web Developer, contributing to the development of two web applications: a Guest App and a Hotel App, along with the backend services using Node.js and Express.js.
- **Key Responsibilities/Development:**
- **Food Ordering:** Developed a robust food order functionality enabling users to order from multiple restaurants simultaneously, enhancing user convenience and satisfaction.
- **Guest Bookings:** Single-handedly built the entire booking flow from scratch, including viewing ongoing, upcoming, completed, or canceled bookings, and providing edit options, which is a critical part of the project.
- **Restaurant Management:** Created a restaurant management page allowing staff to onboard restaurants within the hotel and manage their products and details efficiently.
- **Guest Reports:** Developed a fully customizable Reports page, where users can download daily police reports and weekly backup reports, with the flexibility to add or remove fields as needed.
- **Profile Page** Built the profile page from scratch, where hotel staff can manage all hotel information, including configurations, contacts, and other essential details.
