- Frontend: HTML,CSS, Javascript, Bootstrap
- Backend: Python, MySQL, Django, Flask
- Soft Skills: Decision making, Problem Solving

Certification

- MICROSOFT AUTHORISED EDUCATION PARTNER AND REDHAT TRAINING PARTNER: Completed Full Stack Python in Refinement Software Solutions PVT LTD, Salem

Projects

- **Gaming Store Application**
  A gaming store application built using Django would be a web-based platform designed for buying, selling, and managing video games. It leverages Django's robust features for rapid development, security, and scalability.
- **Weather Application**
  Created Weather Application in Flask framework using HTML,CSS & Javascript. A weather application built using Flask is a web-based tool that allows users to retrieve and display weather information for specified locations. This type of application leverages the Flask microframework in Python to handle the backend logic and serve web pages, often integrating with external weather APIs to fetch real-time
  data.

Declaration

- I here by declare that all the details furnished here are true to the best of my knowledge and belief.
