JOB SUMMARY

Python Backend Engineer with 2+ years of experience in designing and developing RESTful APIs, backend services, and data-driven applications using Python and Flask. Strong experience in SQL, SQLAlchemy ORM, API integration, authorization and building scalable, production-ready systems. Proven ability to optimize performance, handle data integrity, and collaborate with cross-functional teams.

TECHNICAL SKILLS

- **Programming Language** – Python , SQL
- **Backend & web –** Flask ,Django, RESTAPI , SQLAlchemyORM, OAuth, Authentication, NumPy, Pandas, MatplotLib , NLP, Selenium , BeautifulSoup, Llama Index , Image Processing, ETL Pipelines
- **Databases -** PostgreSQL, SQL, Joins, Indexes, Stored Procedures
- **Tools & Technologies** – Flask ,Docker, Azure, PostgreSQL, Regression Testing, A/B Testing ,Unit Testing, CI/CD Pipelines, Agile, Jira, Zephyr

PROFESSIONAL EXPERIENCE

SLK Software **Sept 2023 - Present**

- Developed intelligent data pipelines integrating web scraping with OpenAI-powered LLM extraction, automating unstructured data processing across 100+ websites, increasing reporting speed by 2x.
- Implemented API-driven backend workflows with proper error handling, logging, and database transactions to ensure data integrity and production stability.
- Worked on optimizing database queries and backend logic, improving response time and reducing processing latency by 40%.

EDUCATION

GM Institute of Technology, Davanagere **2019-2023**

Bachelor of Information Science and Engineering

PROJECTS

FISHER HOMES

- Built LLM-based extraction workflows using OpenAI to process scraped 100+ dynamic websites and delivered 95% accurate outputs.
- Built REST APIs using Flask to orchestrate data ingestion workflows, handle requests, manage responses, and persist data using SQLAlchemy and PostgreSQL.

L1 SUPPORT CHATBOT

- Developed backend APIs with session-based authentication and REST endpoints to support real-time chatbot interactions..

OM PORTAL

- Designed backend SQL logic, optimized queries, and implemented database-driven reporting APIs for enterprise dashboards.

RELIUS (FINTECH)

- Developed an interactive banking dashboard using data cleaning, ETL workflows, and visualization to analyze client investments, transactions, and relationship KPIs, enabling actionable insights and risk assessment.

EXTRA CURRICULAR ACTIVITIES

- Solved over 100+ SQL and Python challenges on Data Structures & Algorithms, LeetCode ,HackerRank questions demonstrating strong query problem solving using data structures.
- Best Stellar Team and New Recruit Award for the team building and dedication
- Volunteering and mentoring in technical workshops , highlighting leadership skills.

CERTIFICATION AND AWARDS

- Microsoft PowerBI
- LLM FineTuning on OpenAI
- Python Programming
- AI agents Fundamentals – Hugging Face
