Professional Summary

Detail-oriented Software Developer with practical experience in Django-based backend development and full-stack web applications. Skilled in designing REST APIs, database models, and responsive user interfaces. Actively seeking opportunities as a Full Stack or Backend Developer to contribute to real-world applications while continuously enhancing technical expertise.

Education

R.V.R & J.C College of Engineering, Guntur **August 2023 – April 2026(Expected)**
B.Tech in Computer Science Engineering in Artificial Intelligence and Machine Learning *7.68 CGPA*

Kallam Haranadha reddy Institute of Technology, Guntur **November 2020 – April 2023**
Diploma in Electronics and Communication Engineering *78.52%*

Work Experience

Codtech IT Solutions – Full Stack Development Intern | Remote

Tech Stack: Python, Django, Sqlite **May 2025 – June 2025**

- Developed and deployed **full-stack web applications** using **Django, Python, HTML, CSS, and JavaScript**.
- Integrated third-party APIs to build **data-driven features and dashboards**.
- Strengthened understanding of **end-to-end application development and deployment**.

Oasis Infobyte – Web Development Intern | Remote

Tech Stack: HTML, CSS, Bootstrap, Java Script **May 2024 (1 Month)**

- Designed and developed **responsive web applications** with modern UI components.
- Improved user experience by implementing **mobile-friendly and cross-browser compatible layouts**.
- Worked on frontend logic, UI enhancements, and bug fixes.
- Gained hands-on experience in **web application design and frontend development best practices**.

Projects

Content Management System (CMS) – Django Blog Platform

- Developed a **full-stack blog platform** with complete CRUD functionality for posts and categories.
- Implemented **admin-controlled content management** and secure backend logic using Django ORM.
- Designed a **responsive UI** ensuring smooth user experience across devices.
- Structured scalable models and views to handle dynamic content efficiently.

Handwritten Digit Recognition System

- Built a **CNN-based deep learning model** trained on the MNIST dataset for digit classification.
- Achieved high prediction accuracy through proper data preprocessing and model optimization.
- Developed a **Streamlit-based web interface** for real-time digit prediction.
- Gained hands-on experience in **model training, evaluation, and deployment workflow**

Technical Skills

Languages: Python, Java, JavaScript
Frontend & Backend: HTML, CSS, Bootstrap, Django, Rest API's
Libraries: NumPy, Pandas, Matplotlib
AI & ML: Machine Learning, Deep Learning, NLP
Clouds & Databases: SQL, SQLite
Version Control: Git, GitHub
Developer Tools: Postman, VS Code, PyCharm, Google Colab, Jupyter Notebook
Soft Skills: Problem-solving, Teamwork, Adaptability, Critical Thinking.
