PROFESSIONAL SUMMARY

BCA graduate with hands-on experience in Python (Django) and React with TypeScript, skilled in building REST APIs and performing CRUD operations (Create, Read, Update, Delete). Strong understanding of web development and computer science fundamentals, with the ability to develop efficient backend services and user-friendly frontend interfaces. Eager to grow as a software developer and contribute to team-driven, innovative projects.

TECHNICAL SKILLS

Programming	**:** JavaScript, TypeScript, HTML, CSS
Frameworks/Libraries	**:** React.js, Django , Django-REST-Framework Bootstrap
Databases	**:** PostgreSQL
Tools	**:** Git, GitHub
Languages	**:** English, Malayalam

INTERNSHIP EXPERIENCE

Cyber Square – Python Fullstack Developer

Developed dynamic and responsive user interfaces using React and Bootstrap.Built and integrated RESTful APIs using Django and Django REST Framework.Worked on full-stack development using React for frontend and Django for backend.Used Git and GitHub for version control, branching, and collaborative development.

PROJECTS

- **AR Learning System – Medical Students** | *HTML, CSS, JavaScript, Python, Flutter, MySQL* **–**

  Developed an AR-based interactive learning platform tailored for medical students. Integrated 3D models and interactive content for an enhanced learning experience.

- **Coffee-Shop-Website –** *HTML, CSS , Booststrap* **–**

  Developed a coffee shop website using HTML and CSS. It includes multiple sections like Home, About Us, Gallery, Services, and Contact page with Google Maps integration. I focused on responsive design and clean UI layout.

- **Expense-Management-System –** | *HTML, CSS, Booststrap ,Python, PostgresSQL* **–**

  Developed a responsive expense management system using HTML, CSS, and Bootstrap. The application allows users to add, view, and manage daily expenses with a structured and user-friendly interface. Implemented form validation and responsive design for better usability.
