CAREER OBJECTIVE

A motivated and detail-oriented Computer Science graduate seeking an entry-level Python Developer role. Skilled in Python programming, Object-Oriented Programming (OOP), and problem-solving, with hands-on experience using libraries such as Pandas, NumPy, Matplotlib, OpenCV, and Keras. Familiar with basic machine learning concepts including data processing, data pre-processing, data visualization, and simple model building. Proficient in backend development with Django and database handling using MySQL. Committed to writing clean, efficient, and well-documented code while continuously improving technical skills to contribute effectively to software development projects.

PROFESSIONAL SKILLS

- **Programming Languages:** Python, Object-Oriented Programming (OOP)
- **Python Libraries:** Pandas, NumPy, Matplotlib, OpenCV, Keras
- **Machine Learning:** Data Processing, Data Pre-processing, Data Visualization, Data Modeling
- **Backend Technologies:** Django
- **Frontend Technologies:** HTML, CSS, React.js
- **Databases:** MySQL
- **Version Control:** Git, GitHub
- **Tool:** Power BI

ACADEMIC PROJECTS

Major Project:
Emotion Detection Through Facial Expression Using Deep Learning

Tech stock Used:
Python, Deep Learning, Convolutional Neural Networks (CNN), OpenCV, Dlib, TensorFlow/Keras, Streamlit/Tkinter, FER-2013, CK+ dataset

Responsibilities:

- Developed a real-time system to detect and classify human emotions from facial expressions using CNN.
- Preprocessed datasets with grayscale conversion, resizing, normalization, and augmentation to improve model accuracy.
- Integrated face detection using OpenCV and Dlib for webcam-based emotion recognition.
- Trained and validated the model on benchmark datasets (FER-2013, CK+) using TensorFlow/Keras.
- Built a GUI interface using Streamlit/Tkinter to visualize emotion predictions.
- Achieved multi-class emotion classification (happy, sad, angry, surprised) with high accuracy.

Mini Project:
Machine Learning Approaches for Accurate Product Classification in E-Commerce Companies

Tech stock Used:
Python, Scikit-learn, TensorFlow, Keras, Hugging Face Transformers, OpenCV, Pandas, NumPy

Responsibilities:

- Led the implementation of machine learning models and NLP techniques for product classification, combining text and image features to optimize accuracy.

- Implemented various machine learning models (Random Forest, SVM, Logistic Regression) to classify products into categories using structured metadata and unstructured text.
- Applied NLP techniques (TF-IDF, BERT embeddings) to extract features from product titles and descriptions.
- Integrated computer vision methods using CNNs and OpenCV for image-based classification.
- Enhanced accuracy using ensemble models and hybrid approaches combining image and text inputs.
- Evaluated models using precision, recall, and F1-score; visualized performance with Matplotlib and Seaborn.

EDUCATION

- **B.Tech in Computer Science and Engineering (Artificial Intelligence and Machine Learning)**
  Ellenki College of Engineering and Technology, Patelguda, JNTUH
  2022 – 2025 | CGPA: 6.99

- **Diploma in Mechanical Engineering**
  Govt Polytechnic, Korutla, SBTET
  2015 – 2021 | Percentage: 58.64%

- **Secondary School Certificate (SSC)**
  Mahatma Vidya Niketan High School, Korutla
  2014 – 2015 | CGPA: 8.0

STRENGTHS

- Problem-solving, teamwork, communication, adaptability, quick learning

CERTIFICATIONS

- Python Basics Certification – Great Learning Academy (2025)
- Introduction to Machine Learning Certification – Great Learning Academy (2025)

INTERESTS

- Chess, Movies, Traveling

LANGUAGES

- Telugu, English, Hindi
