Muhammed Shibil

Python Full Stack Developer

GitHub 8606569408 muhammedshibil.dev@gmail.com LinkedIn Kerala,India

PROFESSIONAL SUMMARY

Self-Taught Full Stack Developer specializing in Python (Django) and React.js. Experienced in architecting scalable microservices and AI-driven (RAG) ecosystems, with a strong focus on secure, production-ready code and cloud deployment. Passionate about solving complex problems through modern web technologies.

TECHNICAL SKILLS

Languages: Python, JavaScript (ES6+), HTML5, CSS3, SCSS
Frontend: React.js, Redux Toolkit, Tailwind CSS, Bootstrap, Styled Components
Backend: Django, FastAPI, Django Channels (WebSockets), Microservices, LangChain & RAG Pipelines**,** Google Gemini (LLM), Django REST Framework (DRF), RESTful APIs, JWT, Razorpay
Database: PostgreSQL, DynamoDB, Redis, ChromaDB, Firebase
Tools & Deployment: Docker, Nginx, Cloudinary, Black/Flake8, Git, GitHub, Postman, Swagger/OpenAPI, AWS (EC2, RDS), Vercel, Render, PythonAnywhere

WORK EXPERIENCE

Python Full-Stack Developer (Intern) 06/2025 – Present
Bridgeon solutions LLP Malappuram,Kerala

- Successfully built and deployed 2 major and 2 minor full-stack applications using Django,Fastapi and React.js, managing the complete development lifecycle from initial design to implementation.
- Actively contributed to Agile/Scrum workflows, including sprint planning and daily stand-ups, ensuring efficient team coordination and timely feature delivery.
- Refined technical communication and teamwork skills through regular project presentations, collaborative code reviews, and cross-functional problem solving.

PROJECTS

MyCalo Ai — AI-Powered Native Calorie Tracking Ecosystem 02/2026 – Present

- **Microservices Architecture:** Architected a containerized ecosystem orchestrating **Django** (Core Backend), **FastAPI** (AI Engine), and **Django Channels** (Real-time Service) using **Docker Compose**, with **Nginx** acting as the API Gateway.
- **AI Assistant & RAG Engine:** Engineered an intelligent **AI Assistant** using **LangChain**, **ChromaDB**, and **Google Gemini**; implemented **RAG** for context-aware queries and developed **Text-to-Calorie** and **Image-to-Calorie** pipelines to instantly analyze native foods and nutritional content via LLM.
- **Real-Time Communication:** Developed a low-latency consultation interface using **WebSockets** and **Redis**, integrating **Cloudinary** for secure image/video sharing and **DynamoDB** for scalable chat history storage.
- **Advanced Security:** Secured the platform using **JWT** with **Token Blacklisting** for robust session management and **Google OAuth**, fortified with **Multi-Factor Authentication (MFA)** via Google Authenticator.

- **Frontend State Management:** Integrated **Redux Toolkit** to manage complex global state, specifically engineering a secure **token management system** to handle access/refresh token rotation and user sessions efficiently.
- **Code Quality & Standards:** Enforced production-grade consistency using **Black**, **Isort**, and **Flake8**, while ensuring system reliability through **atomic database transactions**, strict **HTTP status code** adherence, and comprehensive **Swagger/OpenAPI** documentation.

XenFit — Full-Stack E-commerce Platform For Tshirts 12/2025 – 12/2025

- Architected a decoupled full-stack application using **React.js** and **Django REST Framework (DRF)** with **JWT**-based authentication.
- Implemented a secure authentication system with **OTP-based account verification**, access/refresh token rotation, and SMTP-based password recovery.
- Integrated **Razorpay Payment Gateway** with server-side signature verification and automated **order status** synchronization.
- Designed an advanced inventory system supporting product variations (size/color) with real-time **stock updates**.
- Deployed backend on **AWS EC2** using **Nginx** and **Gunicorn** for scalable API handling.
- Configured **PostgreSQL** on **AWS RDS** for production-ready data persistence.
- Secured the platform with a custom domain, **SSL/TLS** (Certbot), and **CORS/CSRF** protection.

Student Learning Management System (SLMS) 11/2025 – 11/2025

- Built a full-stack Django-based SLMS with separate **student** and **mentor** roles.
- Implemented a **Mentor Approval Workflow** where student accounts remain pending until mentors **approve** or **reject** them, including automated confirmation emails.
- Developed **CRUD** operations and bulk semester updates using Django ModelFormsets.
- Designed a responsive UI using HTML and **Tailwind** CSS with a **PostgreSQL** backend.

EDUCATION

Bachelor's Degree 06/2022 – 03/2025
Calicut University Malappuram,Kerala
Fathima Arts and Science College

LANGUAGES

English | Malayalam | Tamil
