I am a dedicated and enthusiastic person pursuing graduation with Bachelor of Engineering in the field of computer science.I brings a strong academic foundation, a passion for learning, and a proactive approach to acquiring new skills. With strong work ethic and eagerness to contribute. I am eager to make a positive impact and grow professionally.

EDUCATION

Bachelor of engineer in Computer science and Engineering
Maharaja institute of technology • GPA: 8.44 Mysore • 12/2022 - 05/2026

PUC in PCMB
Jss pu college for women's sarswathipuram • GPA: 92.33 Mysore • 09/2020 - 05/2022

CERTIFICATIONS

Machine learning with python
Simplilearn

Fundamentals of AI
IBM

Introduction to IOT
NPTEL swayam

PROJECTS

Body fat percentage detection using machine learning | HTML, CSS, JavaScript, python

• Developed a web-based application that predicts body fat percentage using machinel earning models.
• The system collects user inputs such as age, weight, height, and body measurements through a user-friendly interface built with HTML, CSS, and JavaScript.
• The input data is processed and evaluated by a trained ML model, providing accurate body fat percentage estimates.
• The project focuses on enhancing health awareness and providing fitness insights with a simple, accessible tool.
• Emphasis was placed on responsive designa and real-time user interaction to deliver a seamless experience.

Blood bank management| HTML, CSS, JavaScript, MYSQL

• Designed and developed a web-based Blood Bank Management System using HTML,CSS, and JavaScript to streamline the process of blood donation and inventory tracking.
• The system enables efficient donor registration, blood request handling, and real-time availability updates.
• The interface is user-friendly, allowing hospital staff, donors, and recipients to interact with the system seamlessly.
• Key features include donor data management, search functionality by blood group, and responsive design for accessibility across devices.
• This project aims to improve coordination between donors and blood banks, ensuring timely access to critical resources.

SKILLS

C, CSS, HTML, Java, JavaScript, Python, SQL
