ABOUT

Aspiring Frontend Developer with a solid understanding of React, JavaScript, and web fundamentals. Worked on developing small scale React application and continuously enhancing skills through hands-on projects. Passionate about learning new technologies and developing clean, maintainable code while improving problem-solving skills.

WORK EXPERIENCE

TATA CONSULTANCY SERVICES - 6 MONTHS

Worked on maintaining and enhancing reusable UI components for a UK-based application using React.js. Involved in handling component rendering, props, basic state management using hooks, and basic UI updates

SKILLS

Frontend Development (React, JavaScript, HTML5, CSS3)

Developed a responsive Expense Tracker UI using React and Vite, focusing on clean component architecture, state management, and user-friendly interfaces. The application allows users to manage expenses, categorize transactions, view summaries, and analyze spending through charts.
Key Responsibilities & Contributions:

- Implemented expense creation and budget handling using modal-based forms
- Managed application state using React Hooks such as `useState` and `useEffect`
- Integrated chart components to visualize spending patterns
- Structured the project using Vite for faster builds and improved performance
- Maintained clean folder structure and CSS styling for code quality

SKILLS

- HTML5
- CSS3
- Javascript
- React

Basics of:

- Typescript
- Api Integration
- Git

Basics of:

- Node.js
- SDLC
- SEO Principles

Basics of:

- UI UX design
- Wireframes
- Design Principles

EDUCATION

College of Engineering Perumon
Bachelor's of Technology
CGPA: 8.43
