SUMMARY

Computer Science graduate with hands-on experience in MERN stack development using ReactJS, NodeJS, ExpressJS, and MongoDB. Built academic and personal projects, including a full-stack task manager with authentication, CRUD operations, and API integration. Eager to contribute to modern web development teams by creating scalable and user-friendly applications.

SKILLS

Programming JavaScript, Java, Javascript
Web Frontend Html, Css, Bootstrap, React js
Databases MySQL, MongoDB, Oracle
Core Concepts OOP Concepts, Problem Solving, Data Structures, Operating System
Languages Hindi, English, Telugu

EXPERIENCE

Full Stack Development Intern Feb '25 — Jun '25
AMARAVATHI SOFTWARE INNOVATIONS PVT. LTD. Rajahmundry, India

- Developed responsive web applications using HTML, CSS, and JavaScript, enhancing user experience by 0%.
- Used JavaScript for data validation, user interaction, and logic flow in web applications.
- Worked with JavaScript functions, arrays, objects, loops, and ES6 features like arrow functions and promises.
- Building full-stack web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Creating responsive front-end interfaces and integrating them with RESTful APIs.

Full Stack Java Development Intern Oct '23 — Mar '24
Kodnest Bangalore, India

- Developed responsive web applications using HTML, CSS, and JavaScript, enhancing user experience by 30%.
- Improved back-end systems using Java, Spring, and Spring Boot to ensure seamless application performance.
- Optimized database queries in MySQL, MongoDB, and Oracle DB for efficient data retrieval.

PROJECTS

Validation Form using MERN Stack Technologies Apr '25 — Jun '25

- Validation Form developed a form validation system using ReactJS, NodeJS, ExpressJS, and MongoDB, ensuring clean and error-free data submission.
- Implemented real-time client-side validation using React hooks and custom validation functions for fields like email, password, and phone number.
- Built secure backend validation in ExpressJS using libraries such as Joi / Validator.js to prevent malformed data and enhance API security.

Time Series Data Analysis and Traffic Flow Prediction Oct '23 — Mar '24

- Designed a user-friendly web interface for the traffic prediction system using HTML5 and CSS3.
- Designed and implemented deep learning models (RNN, LSTM, GRU) for accurate traffic flow predictions.
- Reduced congestion forecasting errors by 20%, improving urban planning models.
- Conducted time-series data analysis to identify patterns and trends in traffic data.

EDUCATION

Bachelor's of Technology in Computer Science and Engineering, GODAVARI INSTITUTE OF ENGINEERING AND TECHNOLOGY (GPA: 6.74) Dec '21 — May '24

Diploma in Computer Science Engineering , Dr.B.R.A GMR Govt Polytechnic College (GPA: 66.34) Jul '17 — May '20
