Professional Summary

Dynamic and results-oriented B.Sc Applied Physics graduate with hands-on experience in professional accounting, Python development, and Flutter app development. Strong background in customer service, academic coordination, and business operations. Skilled in bookkeeping, GST, Tally Prime, Excel-based analysis, and basic software development. Known for strong communication, problem-solving skills, and the ability to manage multiple responsibilities efficiently.

Professional Experience

Academic Counselor
Al Salama School of Safety Studies, Kalamassery

- Counseled students on course selection and career pathways
- Handled student inquiries, follow-ups, and admissions support
- Maintained accurate student records and documentation
- Coordinated with faculty and management for smooth academic operations
- Provided post-admission support and resolved student concerns

Internships & Professional Training

Python Development Intern
IPCS Global, Calicut

- Hands-on training in Python programming fundamentals
- Worked with control structures, functions, and basic data structures
- Developed small Python programs and mini projects
- Applied Python concepts for basic data handling and analysis

Flutter Development Trainee
Luminar Technolab, Kochi

- Trained in Flutter and Dart for cross-platform mobile application development
- Designed user-friendly UI components and implemented navigation
- Learned basic state management and API integration concepts
- Built simple mobile applications as part of training

Professional Accounting Trainee
Inmakes Learning Hub, Kochi

- Practical training in accounting and real-world business processes
- Hands-on experience with Tally Prime, GST, invoicing, and financial reporting
- Learned bookkeeping, ledger maintenance, and statutory compliance basics

Education

B.Sc Applied Physics
University of Calicut

- Studied core concepts of Physics, Mathematics, and Applied Computing
- Developed analytical, research, and problem-solving skills through labs and projects

Academic Projects

SCAPS 1-D Solar Cell Simulation

- Conducted one-dimensional solar cell simulations using SCAPS software
- Analyzed efficiency, open-circuit voltage, and short-circuit current
- Studied effects of material properties and layer thickness
- Prepared reports and visualized results for presentation

Mobile Application Development using Flutter

- Designed and developed a mobile application using Flutter and Dart
- Implemented UI components, navigation, and basic logic
- Tested application functionality and fixed bugs

Python Mini Project – Expense Tracker

- Developed a simple expense tracking application using Python
- Implemented features to add, view, and categorize daily expenses
- Generated summary reports to analyze spending patterns

Skills

- **Accounting & Finance:** Bookkeeping, Invoicing, Financial Reporting, GST, GCC VAT, Tally Prime
- **Programming Languages:** Python (Basics), Dart, SQL
