Professional Summary

Results-driven Backend Developer with strong expertise in Java, microservices, Mendix, database optimization, delivering high-performance, scalable, and reliable enterprise applications.

Skills

Languages: Java, Python, JavaScript, C/C++, SQL

Technologies & Tools: Spring Boot, Spring Security, Spring JPA, J2EE, React, Hibernate(ORM), Apache Kafka, Microservices, Rest API, Bootstrap, Docker, AWS, Django, PostgreSQL, MySql, MongoDB, Databricks, Data Structures, Design patterns, System design, Agile, Maven, Problem solving

Work Experience

Optimum Solutions, Chennai Oct 2024 - Present

Associate Consultant

- Improved application performance by 35% by developing optimized **Java Action Calls** and applying **Data Structures and Algorithms** (efficient data retrieval, caching, and optimized logic), reducing processing time and enhancing system responsiveness.
- Built and integrated 10+ microservices for the **Mendix platform**, enabling seamless backend communication and reducing manual effort by 40% through process automation.
- Implemented new business features and batch processes in Mendix with advanced error-handling mechanisms, and worked with **PostgreSQL** within the Mendix environment by writing and optimizing SQL queries for data validation, reporting, and backend operations, improving system reliability and database efficiency.
- Processed large and complex datasets using **Databricks**, executing high-performance queries and data workflows, resulting in 25% improvement in data processing speed and better analytical support.
- Enhanced system stability and data accuracy by troubleshooting backend and database performance bottlenecks across Java, Mendix, and PostgreSQL layers, improving overall operational efficiency by 20%.
- **Tools and Technologies Used:** Java, Mendix, PostgreSQL, Databricks, Microservices Architecture, SQL, Data Structures and Algorithms.

Education

IFET College of Engineering, Villupuram, Tamilnadu Sep 2021 - Apr 2024
B.E. in Computer Science and Engineering ***CGPA: 8.4/10***
Relevant Coursework: Object Oriented Programming, Databases Management System, Discrete Mathematics, Data Structures and Algorithms, Operating Systems, Computer Networks, Machine Learning, Data Warehousing and Data Mining, Design Structures, Compiler Design

Seshasayee Institute of Technology July 2018 - Jun 2021
Diploma in Electrical and Electronics Engineering ***CGPA: 8.2/10***
Relevant Coursework: C++ Programming, Programmable Logic Controller, Logic Gates

Project Works

- **Multi-role Task Management Application (Ongoing):** Developing a task management system with support for multiple user roles and role-based access control. Backend is built with Spring Boot, Spring Security, Java Mail Sender, Spring Data JPA, and PostgreSQL. The frontend, developed using React, provides a clean and responsive UI.
  Tools and Technology Used: Spring Boot, Spring Security, Spring Data JPA, PostgreSQL, React.
- **E-commerce Application (2025):** Built a e-commerce platform with secure authentication, product management, and order processing. Focused primarily on backend development using Spring Boot, Spring Data JPA, Spring Security, and PostgreSQL. Integrated the React-based frontend via CORS for seamless client-server communication.
  Tools and Technology Used: Spring Boot, Spring Data JPA, Spring Security, PostgreSQL, React.
- **College Grievance Management System (2023):** Developed a web-based platform using Django to manage and resolve student complaints. Implemented secure login, PostgreSQL for data storage, and HTML/CSS/JavaScript for the frontend interface.
  Tools and Technology Used: Django, PostgreSQL, HTML, CSS, JavaScript.
