Professional Summary

Entry-level Python Developer with hands-on internship experience at Luminar Technolab, Kozhikode, trained in Python full-stack development. Proficient in Python, JavaScript, HTML, and CSS, with practical experience in building web applications using Django, Django REST Framework (DRF), React, and Bootstrap. Familiar with developing and testing RESTful APIs, implementing backend logic, and working with MySQL databases using Django ORM. Strong foundation in Object-Oriented Programming (OOP), basic Data Structures and Algorithms, software debugging, and SDLC fundamentals. Experienced with development tools such as Git, Postman, and VS Code. Quick learner with strong analytical and problem-solving skills, eager to apply technical knowledge and grow as a Python Developer in a collaborative, Agile work environment.

Skills

Programming Languages: Python, JavaScript, HTML, CSS
Frameworks : Django, Django REST Framework (DRF), React ,Bootstrap
Databases: MySQL, Django ORM
Tools Platforms: Git, Postman, VS Code
Core Concepts: Object-Oriented Programming (OOP), RESTful Services, Basic Data Structures Algorithms, Software Debugging, SDLC Basics

Experience

Intern- Python Django Full stack, Luminar Technolab, Kozhikode Jan 2025 – Aug 2025

- Completed hands-on training in Python Full-Stack Development, covering Python, HTML, CSS, JavaScript, Bootstrap, Django, React, and MySQL, with emphasis on application development fundamentals.
- Developed and tested web application features using Django, and integrated React-based frontend components in a second academic project to enable dynamic and responsive user interfaces.
- Designed data models and executed database operations using Django ORM, applying relational database concepts and integrating MySQL for reliable data persistence.
- Followed structured software development practices, including code organization, debugging, version control, and iterative testing, to ensure application stability and maintainability.

Projects

Study Buddy – Productivity & User Behavior Chrome Extension

- Designed and developed productivity features including Pomodoro timer, to-do lists, and visual analytics using HTML, CSS, JavaScript, and Chrome APIs.

- Implemented custom site-blocking logic to improve user focus and engagement.
- Tested and refined features to ensure usability and performance.
- **Tech:** HTML, CSS, JavaScript, Chrome Extension API

E-commerce Platform – Transaction & Data Workflow System

- Designed and implemented backend modules for user authentication, order management, and payment processing using Django.
- Integrated Razorpay payment gateway and ensured secure transaction handling.
- Optimized database workflows using Django ORM to support efficient data operations.
- Tested application components to meet functional and performance requirements.
- **Tech:** Python, Django, HTML, CSS, JavaScript, Bootstrap, Razorpay API,

Serene – Mental Health Analytics Platform

- Developed full-stack features including guided meditation modules, journaling tools, and chatbot feature using predefined logic and APIs.
- Integrated frontend and backend components using React and Django REST Framework to enable seamless data exchange.
- Focused on usability, data flow, and API integration to enhance user experience.
- **Tech:** React,Django REST API

Education

Govt. Engineering College Thrissur
B.Tech – Electrical and Electronics Engineering

Certificates

AI for Beginners – HP | Jul 2025
Data Analytics Job Simulation - Deloitte | Oct 2025
SQL(Intermediate) -HackerRank |Nov 2025|
