**GitHub:** https://github.com/adwaith651/adwaith

**Python Anywhere:** https://adwaith46.pythonanywhere.com/

## OBJECTIVE

To start my career in the IT industry by using the knowledge gained during my BCA studies along with my skills in Python full stack development. I aim to build useful and user-friendly web applications, continue learning new technologies and grow as a valuable member of a development team.

## EDUCATION

MAHATMA GANDHI UNIVERSITY 2021-2024

**BACHELOR OF COMPUTER APPLICATION**

HIGHER SECONDARY EDUCATION 2019-2021

**BIOMATHS**

## PROJECTS

### Salon booking system

A web-based platform enabling customers to book salon services and make payments online. Admin panel supports service management, appointments, and refunds.

### Electronic gadgets chat app

A web app for renting electronic devices. Built using Django and Bootstrap. Supports three user roles:Admin(manages users/shops), Shop Keeper (adds products, handles orders), and User (browses, books,and pays). Features include user authentication, cart management, and admin dashboards.

### Skin clinic management

A desktop application for managing patient records in a skin clinic. Used by staff including doctors,labtechnicians,and pharmacists.Offers modules for appointments,records,prescriptions and analytics.
