Professional Summary :

Motivated and detail-oriented Computer Science graduate and **Full Stack Developer** with strong skills in **Python, Django, Oracle Database, JavaScript, React, HTML, CSS** and **Machine Learning**. Proficient in Object-Oriented Programming (**OOP**), familiar with Git and **SDLC** process. Passionate about building scalable web applications, solving technical challenges through clean and efficient code, applying data-driven insights using **Machine Learning models.** Eager to start a career in software development and grow through continuous learning, innovation, and collaboration.

Education :

- **MCA** | Sri Harsha Institute of PG Studies, Kovur | 2025 | **80%**
- **Bachelor's Degree in B.SC - MSTCS | Vidylaya Degree College**, Gudur | 2023 | **73%**
- **Intermediate (MPC)** | Sri Swarnandhara Bharathi Junior College, Gudur | 2015 | **67%**
- **SSC (10th Grade)** | ZP High School | 2013 | **75%**

Technical Skills :

- **Programming & Web Development :** Python, HTML, CSS , Bootstrap, JavaScript & ReactJS.
- **Framework :** Django.
- **Database :** Oracle.
- **Data Analysis & Visualization :** Pandas, NumPy, SciPy & Matplotlib.
- **Tools & Version Control:** Git, GitHub, VS Code.
- **Soft Skills :** Communication, Problem-solving, Teamwork, Attention to Detail.

Certification: Python Full- Stack Developer.

Projects :

Project 1 - Omnifoods – Restaurant Website Clone :

- Developed a user authentication system with login functionality to manage secure access for customers and administrators.
- Designed a categorized food menu interface, allowing users to browse items by type (e.g., Staters, main Course, Desserts).
- Implemented dynamic price tags for each food item, enabling clear visibility of cost with support for discounts and future price updates by using Python.
- Built a responsive and visually appealing front-end layout using HTML and CSS, optimized for mobile and desktop devices.
- Integrated admin panel capabilities to manage menu items, including adding, editing, and deleting food entries in real time.
- Used HMTL and CSS components to ensure mobile-friendly design and enhanced layout consistency.
- **Technologies used:** Python, Django, HTML5, CSS3, Bootstrap, Oracle, Authentication, MVT Architecture.

Project 2 - CampusBook Hub: Academic Library Portal

- Creating library application. In this app students and staff log in using their unique IDs.
- Users can view books by academic batch (1st–4th year) and program(Degree/B.Tech).
- Lecturers can add new books and authors based on curriculum requirements.
- Books are listed alphabetically by title or author, with filter options.
- Each book entry includes its physical location (e.g., shelf or row) for easy identification.
- **Technologies used:** Python, Django, HTML5, CSS3, Bootstrap, Oracle, Authentication, MVT Architecture**.**

Key Strengths

- Strong analytical and problem-solving abilities.
- Capable of efficiently working with large datasets.
- Fast learner, adaptable to new technologies and environments.
- Clear and effective verbal and written communication.
