BALUSU BHAVYA

: Chekkapalli +91-8125934518 LinkedIn : bhavyabalusu@gmail.com

PROFESSIONAL SUMMARY:

Data Science Intern with hands-on experience in building machine learning projects. Skilled in data cleaning, analysis, and visualization to find useful insights from data. Familiar with applying AI/ML techniques to real-world problems and contributing to project outcomes. Looking for opportunities to grow as a data professional and support data-driven decision-making.

EDUCATION:

Kakinada Institute of Engineering and Technology for Women, Kakinada. 2021-2025
CSE-Artificial Intelligence and Data Science [CGPA-8.0]

Sri Chaitanya Junior College, Vijayawada 2019-2021
Intermediate (MPC)[CGPA-9.6]

Thrividha English Medium High School, Nuzvid 2018-2019
S.S.C [CGPA-9.5]

TECHNICAL SKILLS:

- **Programming Languages :** Python, C, Java
- **Web Technologies :** HTML, CSS
- **Developer Tools :** MS Excel, MS Word, MS Powerpoint, Power BI
- **Data Base :** SQL
- **Technology :** Artificial Intelligence and Machine Learning

PROJECTS:

Movie Recommendation System | Python, Machine Learning libraries

- Collaborated with a team of four to design and develop a web-based movie recommendation system
- Leveraged the IMDB dataset containing movie names, ratings, reviews, and genres to build an efficient recommendation algorithm using Python and Machine learning libraries
- Focused on data preprocessing, feature extraction, and creating a user-friendly interface for seamless user experience

Age and Gender Prediction | Python , OpenCV

- Developed a system to predict age and gender from facial images using OpenCV
- Used OpenCV for face detection and preprocessing, and applied a trained model for predictions
- Built a simple interface to allow users to upload photos and get age and gender predictions easily

EXPERIENCE:

Data Science Intern | VOZIQ AI **JUNE2025-DEC 2025**

- Working on real-time data science projects involving data preprocessing, model building, and performance analysis
- Assisting in developing machine learning models and analyzing large datasets to derive meaningful insights.
- Worked on a **Customer Churn Prediction** project using **Machine Learning** techniques.
- Collaborating with the team to apply AI techniques for improving project outcomes and automation.
