Vaibhav Kandharkar

Software Engineer — Full Stack Java Developer
+91 9325378590 — vaibhavk0099@gmail.com — linkedin/vaibhav-kandharkar — github.com/Vaibhavkandharkar

Education

CSMSS Chh. Shahu College of Engineering, affiliated to DBATU **Sep. 2021 – May 2024**
B.Tech in Computer Science and Engineering *Aurangabad, Maharashtra*

Relevant Coursework

- Java Programming
- Spring Boot
- React.js
- DBMS
- RESTful APIs
- Data Structures Algorithms

Professional Summary

- Full Stack Java Developer with hands-on experience in building **production-grade applications** using **Java, Spring Boot, REST APIs, React.js, and MySQL**.
- Designed and implemented **scalable and secure backend systems** following clean architecture principles, improving API performance and system reliability.
- Developed and optimized **RESTful APIs** to support real business workflows, enabling efficient data processing and seamless frontend integration.
- Built responsive user interfaces using **React.js** with focus on usability, performance, and mobile-first design.
- Collaborated with cross-functional teams in **Agile environments** to translate business requirements into deployable, production-ready features.
- Actively focused on **code quality, performance optimization, and continuous learning** of modern Java and backend technologies.

Skills

- **Languages:** Java, SQL, JavaScript, HTML5, CSS3
- **Backend Technologies:** Spring Boot, Spring MVC, Hibernate, JPA, RESTful APIs, Microservices Architecture
- **Security:** Spring Security, JWT Authentication, Role-Based Access Control (RBAC)
- **Databases:** MySQL, PostgreSQL (Schema Design, Query Optimization, Indexing), MongoDB
- **Frontend Technologies:** React.js, Redux, Angular, HTML5, CSS3, Tailwind CSS
- **DevOps & Tools:** Docker, Git, GitHub, Maven, Postman, IntelliJ IDEA
- **Testing & Practices:** JUnit, CI/CD Basics, Clean Code Principles, Agile/Scrum
- **Cloud (Basics):** AWS EC2

Experience

PayPerJump Pvt. Ltd. **Aug 2024 – Oct 25**
Full Stack Web Developer (Full-Time) *Aurangabad, Maharashtra*

- Designed and developed **production-ready full stack applications** using **Java, Spring Boot, RESTful APIs, React.js, and MySQL**, supporting real business workflows for real estate and lead management platforms.
- Implemented **secure authentication and authorization** using **Spring Security and JWT**, enabling role-based access control for admin and business users.
- Developed and optimized **RESTful APIs** for lead tracking, property listings, dashboards, and CMS workflows, improving data retrieval efficiency by **approximately 40%**.
- Designed normalized **MySQL database schemas** with proper indexing strategies, reducing query execution time and improving overall application stability.
- Built responsive **admin dashboards in React.js** used by internal teams to manage leads, properties, and customer interactions across devices.
- Collaborated with clients and cross-functional teams in **Agile development cycles**, translating business requirements into scalable and deployable features.

PayPerJump Pvt. Ltd. **Mar 2024 – Aug 2024**

Full Stack Web Developer Intern *Aurangabad, Maharashtra*

- Worked on full-stack application modules using **Java, Spring Boot, React.js, and MySQL**, contributing to scalable client-facing systems.
- Developed and tested **RESTful APIs** and supported backend logic implementation, gaining hands-on experience with data workflows and service integration.
- Implemented responsive UI components in **React.js**, improving interface consistency and user experience across devices.
- Collaborated with senior developers in **Agile development cycles**, participating in requirement discussions, code reviews, and feature enhancements.
- Contributed to production modules, strengthening understanding of **performance optimization, security fundamentals, and clean coding practices**.

Projects

Bhagya Rental App — Enterprise Rental & Property Management Platform

Java, Spring Boot, Spring Security (JWT), REST APIs, MySQL, React.js **2025**

∗ Designed and developed a **production-ready full-stack rental management platform** for a real-estate client, supporting property listings, bookings, agreements, and admin workflows.

∗ Architected and implemented **Spring Boot RESTful APIs** following layered architecture (Controller, Service, Repository) for scalable backend development.

∗ Implemented **JWT-based authentication and role-based access control (RBAC)** using Spring Security to secure user and admin operations.

∗ Designed and optimized **MySQL database schemas** with indexing and pagination, improving API response time and data retrieval performance.

∗ Developed responsive and reusable **React.js UI components** for admin dashboards and user interfaces, ensuring seamless cross-device experience.

∗ Collaborated with stakeholders to translate business requirements into secure, scalable, and maintainable software features aligned with enterprise standards.

Gmail Clone – Full-Stack Web Application

MongoDB, Express.js, React.js, Node.js (MERN) **January 2025**

∗ Built a secure email platform with JWT authentication, real-time inbox updates, dynamic search, and responsive UI using React.js and Tailwind CSS.

∗ Improved user efficiency with seamless email filtering, fast search, and intuitive navigation experience.

· Mentored interns at PayPerJump Pvt. Ltd., helping them understand project structure, SDLC processes, and clean coding practices.

· Actively participated in sports and cultural activities, demonstrating teamwork, discipline, and commitment.

· Led a cricket team to the semi-finals, showing leadership, decision-making, and performance under pressure.
