EDUCATION

B.E. COMPUTER SCIENCE AND ENGINEERING

Mangayarkarasi College of Engineering

2020 – 2024 Madurai, Tamil Nadu

- CGPA: 7.3 / 10 (71%)

CLASS XII

Government Higher Secondary School

2018-2020 Madurai,Tamil Nadu

- Group:Computer Science & Mathematics

TECHNICAL SKILLS

Programming Languages:

- Python, JavaScript, MySQL

Backend:

- Django, REST APIs

Frontend:

- HTML5, CSS3, Bootstrap, React.js

Database:

- MySQL, SQL, ORM Integration

Tools:

- Git, GitHub, Heroku (basic), VS Code, Postman

Others:

- OOPs, MVC Architecture, Basic DSA

CERTIFICATIONS

- **Employability Skills Development Training** – Titan Leap & Naandi Foundation
- **Research Paper Presentation** – "Dreamwalk 36" at ETET'24, Mangayarkarasi College of Engineering

SOFT SKILLS

- Problem Solving and Analytical Thinking
- Communication and Team Collaboration
- Quick Learner and Adaptability

LANGUAGES

- English – Fluent
- Tamil – Native

SUMMARY

Aspiring **Software Developer** with hands-on experience in developing modern **web applications** using **Django** and **React.js**. Skilled in building **responsive user interfaces**, integrating **RESTful APIs**, and implementing backend logic with **Django ORM and** . Proficient in using **Git** for version control, testing APIs with **Postman**, and collaborating in **agile development teams** to deliver efficient **software solutions**.

EXPERIENCE

Software Developer

Ascox Technosoft Solution Pvt Ltd

Nov2024 - Nov2025 Madurai,Tamil Nadu

- Designed and developed backend modules for enterprise-level **web applications** using **Python (Django, REST Framework)**.
- Built and maintained **RESTful APIs** using and **Django REST**, ensuring high performance and clean API design.
- Designed, optimized, and managed relational databases using **MySQL**; performed efficient **CRUD operations** and query optimization.
- Implemented **business logic**, **user authentication**, and **role-based access control** using Django Security and Spring Security concepts.

PROJECTS

E-Commerce Dressing Shop

- Developed a full-stack e-commerce application allowing users to register, browse clothing products, manage cart, and place orders.
- Used **Django ORM** to handle database interactions with **MySQL**; designed models for products, categories, users, and orders.
- Applied **Bootstrap** and custom CSS for responsive frontend UI and used **GitHub** for version control.

Bakery Billing Invoice System

- Developed a billing system to manage customer order payments, including **initial**, **advance**, and **final payments**.
- Implemented **monthly tracking** and reporting features for sales and payment history.
- Built using **Python**, **Django**, and **REST Framework**, following MVC architecture.
