NAVIN P

JUNIOR SOFTWARE DEVELOPER

☎ 6383034180 navin152002@gmail.com

ABOUT ME

Python Developer with 2 years of experience in building and maintaining scalable applications. Proficient in Python, backend development, and problem-solving, with expertise in supporting E-commerce platforms. Skilled in collaborating with teams to deliver high-quality software solutions.

EDUCATION

- **BE (IT)**
- **Annamalai University, Chidambaram**
- **2019 – 2023**

SKILLS

- **Python**
- **HTML**
- **CSS**
- **JavaScript**
- **DAX**
- **jQuery**
- **ReactJS**
- **Django**
- **MVC**
- **MySQL**
- **MongoDB**
- **Angular**
- **Jira**
- **Redux**
- **NumPy**

WORK EXPERIENCE

- **Unobridge Solution India Private Limited**
- **Jan 2024 – Present**

PROFESSIONAL SUMMARY

- 2 years of professional experience in Python for backend development, scripting, and automation.
- Proficient in HTML, CSS, and JavaScript for creating responsive and interactive web applications.
- Skilled in Django framework for developing scalable web applications with MVC architecture.
- Hands-on experience with ReactJS and Redux for building dynamic frontend applications.
- Knowledge of Angular for designing modular and maintainable web components.
- Expertise in MySQL and MongoDB for designing and managing relational and NoSQL databases.
- Experienced in NumPy for data analysis and numerical computations in Python.
- Proficient in jQuery for DOM manipulation and enhancing frontend interactivity.
- Strong understanding of MVC architecture for efficient and organized application development.
- Skilled in writing clean, optimized, and reusable code for web and data applications.
- Experience with DAX for data modeling and analytics in Power BI.
- Familiar with RESTful APIs integration and data exchange between frontend and backend.
- Knowledge of version control using Git & GitHub for collaborative development.

Project Worked

Project : 2 | Domain : E - Commerce | **Client** : Bouclair **Duration** : Mar 2025 - Till now

Description :

Bouclair is a leading Canadian home décor and lifestyle brand specializing in stylish furniture, wall décor, lighting, textiles, and accessories. The company focuses on delivering affordable, modern, and trend-driven designs that enhance everyday living spaces.

Responsiblities :

- Developed and maintained scalable web applications using Python, Django, and MVC architecture to ensure robust backend functionality.
- Designed and implemented responsive and interactive user interfaces with HTML5, CSS3, JavaScript, ReactJS, and Angular.
- Integrated frontend and backend components to deliver seamless user experiences and optimized web performance.
- Created reusable components and managed application state efficiently using Redux and jQuery.
- Developed RESTful APIs to enable communication between server and client applications.
- Designed and maintained relational (MySQL) and non-relational (MongoDB) databases for efficient data storage and retrieval.
- Applied NumPy and other Python libraries for data manipulation, analysis, and computational tasks.
- Implemented data visualization and reporting solutions using DAX for business intelligence purposes.
- Collaborated with cross-functional teams in Agile environment for requirement gathering, sprint planning, and delivery

Project : 1 | Domain: Insurance | **Client** : Insurify **Duration :** Jan 2024 - Feb 2025

Description :

Insurify is a leading digital insurance comparison platform that simplifies the process of finding and purchasing auto, home and life insurance. Leveraging advanced AI and data-driven technology, the platform delivers personalized policy recommendations tailored to customer needs. Insurify partners with top insurance providers to offer competitive quotes and seamless policy management.

Responsiblities :

- Performed code reviews, debugging, and unit testing to maintain code quality and reliability.
- Ensured web application security and data integrity by implementing best practices in authentication and authorization.
- Optimized application performance, including database queries, API responses, and frontend load times.
- Created technical documentation for developed modules, APIs, and user interfaces for knowledge sharing.
- Stayed updated with emerging technologies and implemented modern frameworks and libraries to improve project efficiency.
- Participated in production deployment, monitoring, and maintenance of applications to ensure minimal downtime and high availability.
