Bengaluru, Karnataka, 560037, India

Professional Summary

Enthusiastic AI and Full Stack Developer with a strong foundation in Python, Machine Learning concepts, and full-stack web development. Skilled in building basic machine learning models and developing end-to-end web applications using modern technologies. Passionate about solving real-world problems through AI-driven and scalable software solutions. A quick learner with a strong work ethic, seeking a paid internship opportunity to gain hands-on industry experience and grow in a collaborative environment.

Education

- **Master of Computer Applications** *2023 - 2025*
  Centurion University Of Technology and Management, Bhubaneswar CGPA: 8.05
- **Bachelor of Science** *2020 - 20233*
  Utkal University, Bhubaneswar CGPA: 7.92

Experience

- **Octa Net Software Pvt. Ltd.** *March 2025 - May 2025*
  Full Stack Developer Intern Remote
  - Engineered and deployed full-stack web features using Python Django, React.js, and MySQL, boosting system efficiency by 25%.
  - Integrated RESTful APIs, reducing server response time by 20% and enabling seamless client–server interaction.
  - Strengthened authentication and authorization protocols, mitigating security risks by 30%.
  - Collaborated in Agile sprints, delivering modules 10% faster through effective teamwork and version control.

Projects

- **E-Commerce Web Application (Mini Amazon)** *March 2025 - May 2025*
  Tools: React.js, HTML5, CSS3, JavaScript, Python, Django, MySQL, Authentication, JWT, Stripe, Git, AWS
  - Launched a full-stack e-commerce platform with Django and React.js, processing 5,000+ monthly transactions and improving order fulfillment efficiency by 40%.
  - Implemented secure authentication, role-based authorization, and a shopping cart with order management using JWT, ensuring data privacy and smooth transactions.
  - Integrated Stripe payment gateways, delivering a seamless checkout experience.
  - Developed an interactive admin dashboard for product, inventory, and order management, enhancing scalability and reliability.
- • **IPL Data Analysis** *Nov 2025 - Dec 2025*
  Tools: Python, Pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
  - Constructed○ Constructed a data analysis pipeline for IPL datasets, uncovering insights into player performance and team statistics.
  - Optimized preprocessing and feature engineering workflows, processing 15,000+ match and player records.
  - Visualized key metrics (win ratios, strike rates, economy trends) with Matplotlib and Seaborn for improved decision-making.
  - Designed reusable Python modules for integration with ML models to predict match outcomes.

Skills

- **Programming Languages:** Python, JavaScript (ES6+)
- **Web Technologies:** Django, Flask, React.js, RESTful APIs, Bootstrap, HTML5, CSS3
- **Database Systems:** MySQL, Oracle
- **Cloud Technologies:** AWS (EC2, S3, RDS)
- **Specialized Area:** Full Stack Development, Machine Learning, Numpy, Pandas, Matplotlib, Seaborn, API Development, Problem Solving
- **Other Tools & Technologies:** Postman, Jupyter Notebook, VS Code, pyCharm, IDLE
